The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued on Saturday morning, with the latest news up to midnight of Friday.

TERMS OF SUBSCRIPTION—PAYABLE IN ADVANCE:

For One Year, (including postage)	\$10 20.
For Six Months do	6 10.
Annual subscription in London (including postage)	42 6s.
Six mos. do	1 7s.

Subscriptions will be continued until ordered stopped by a written order, or at the publication office. The Publishers cannot be responsible for Remittances unless made by Drafts or Post-Office Money Orders.

London Office.

The London office of the CHRONICLE is at No. 5 Austin Friars, Old Broad Street, where subscriptions will be taken at the prices above named.

Advertisements.

Transient advertisements are published at 25 cents per line for each insertion, but when definite orders are given for five, or more, insertions, a liberal discount is made. No promise of continuous publication in the best place can be given, as all advertisers must have equal opportunities. Special Notices in Banking and Financial column 60 cen's per line, each insertion.

WILLIAM B. DANA, J. & CO., Publishers.
JOHN G. FLOYD, JR., 79 & 81 William Street, NEW YORK.
Post Office Box 4592.

A neat file-cover is furnished at 50 cents; postage on the same is 18 cents. Volumes bound for subscribers at \$1 50.

RESUMPTION AND THE GOLD SPECULATORS.

Increased confidence in business circles is the result of the first week's proceedings in Congress. A fear, lest disturbing legislation might be attempted, has for weeks existed. The end proves, on the contrary, that a very conservative spirit prevails, and Mr. Sherman is left in control of the situation. To be sure, the Silver bill, a legacy of the last session, is still in operation; but even if the Secretary's recommendations on that subject are not complied with this winter, entire confidence may be felt that, with resumption secured and business revived, the next Congress will quickly apply the needed relief. Thus the progress of events removes the hindrances, one after another, to a quiet and easy return to a specie basis.

The latest, and probably the last effort of the opposition, is the gold speculation in our market which we referred to last week. It is a well-laid scheme, and if the assistance of Congress could have been secured might perhaps have proved disturbing for a brief period. A very few millions of dollars turned over a great many times, by borrowing each time

greenbacks on the gold drawn from the Treasury, would be a very powerful lever, if enough unscrupulous, greedy lenders could be found to act as tools in such a conspiracy, for it is nothing less. From information received, we believe the plan, although apparently relinquished, is by no means abandoned, but simply for the moment at rest, with the hope of widening the circle of lenders, while at the same time interesting a few enterprising Congressmen, who shall, as their contribution to the partnership, give a disturbing vote or two at Washington.

This combination of forces is all very ingenious, but the conditions of our currency problem are such that the venture cannot fail to be a losing one. In the first place, the week has proved that neither the silver men nor the inflationists, as a party, can be led into legislation simply irritating. But, independent of that, the position of the Treasury is far too strong for these speculators, not only in its actual possessions, but in the trade of the country, which must control the exchanges. It is even wrong, in one sense, to speak of the Treasury's gold reserve for resumption as only the resumption fund. So long as greenbacks are at par, all the gold the Secretary holds is available for his purposes in an emergency. On the first of January his total gold balance will probably amount to over 200 millions. When these enterprising speculators begin to draw, the Secretary will, of course, give them all they want, requiring, however, that they shall carry it off; gold certificates are no longer available. Then comes the interesting question, which they will have to solve for themselves and for those who lend on it—where or how shall we keep it? The bank vaults are not open to them. Of course, a few millions could be easily disposed of; but as, day after day, these accumulations increased, such possessions would become a very embarrassing burden, and one that must lessen rapidly the eagerness of lenders. But little time, we think, would be required for the combination to realize, in the expressive words of one of Mrs. Stowe's characters, that "they had bit off more than they could chew." In this connection, also, the recent suggestion in the financial column of the *World* newspaper to those who are invited to lend money upon pledge of gold coin, is quite worthy of attention. That writer stated that it would be wise for any who are not above earning interest in that way to verify the contents of every bag, and see that the security is worth what it purports to be.

A resolution passed at a meeting of the Chamber of Commerce, Thursday, bears upon the same general subject of resumption. The stated object of the resolution

is a very desirable one, and yet there is an additional advantage in the Treasury adopting the suggestion which was not mentioned. The resolution was as follows.

Resolved, That in view of recent developments at the New York Custom House, resulting in a large claim upon one of our oldest and most respectable importing houses for duties declared unpaid upon goods delivered to said firm, months and years ago, the attention of the Secretary of the Treasury be invited to the insecurity of the present system of collecting duties, and that he be respectfully requested to secure the passage of a law by Congress which will enable the importers to pay duties in certified checks upon banks of this city to be approved by the Collector.

The evil complained of is one of long standing; the remedy proposed is very simple, and, with specie payments restored, any objection to its adoption seems to be removed. Furthermore, is not the change especially desirable, after resumption, as a step in the process of making a closer connection between the Sub-Treasury system and the commerce of the country. For a merchant to be compelled to actually procure the gold or legal-tenders, and present them in payment of customs duties, requires not only time and labor, but the temporary and unnecessary abstraction of the basis of our currency from the channels of trade. If through the Clearing-House, on the general settlement of balances with the Sub-Treasury, only the balance due was paid in, it would be a very small movement and much less onerous to commerce. We trust that the attention of Congress will be early called to this subject. We should also like to see one other change introduced, and that is, that in the further funding of our bonds different dates of interest payment should be introduced, so that as the taxes go in, month after month, the interest could go out. Certainly, no good purpose is served in keeping locked up in Government vaults, a moment longer than absolutely necessary, the capital which is abstracted from commerce to pay the interest and expenses of the Government.

THE FINANCES AND THE TREASURY DEPARTMENT.

No Secretary of the Treasury, since Mr. Chase, has occupied so prominent and responsible a position as does the present Secretary; and if his clear, well-written, and sensible report—which is given in full elsewhere in this paper—does not command closer attention than such documents usually receive, it will be only because the tenor of it and the principal facts presented regarding the financial condition have been already made public from time to time.

The report opens, as usual, with the schedules of actual and estimated receipts and expenditures, from which we select the principal items and compare them as below with those of the last two previous fiscal years.

	1877-78.	1876-77.	1875-76.
RECEIPTS.			
Customs	\$130,170,680	\$130,956,493	\$148,071,991
Internal revenue	113,531,625	118,639,408	116,700,732
Circulation and deposits of nat'l banks ..	6,983,013	7,078,551	7,318,573
Customs fees, fines, &c.	1,046,861	1,044,713	183,797
Premium on coin sales	817,102	249,581	3,723,516
Profits on coinage	1,690,762	3,273,239	1,741,118
Total receipts	\$257,765,879	\$269,000,586	\$287,482,039
EXPENDITURES.			
Civil	\$16,321,323	\$15,794,188	\$17,232,249
Pensions	27,137,019	27,963,712	18,357,396
Indians	4,629,350	5,277,007	5,964,258
Foreign intercourse	1,220,217	1,221,739	1,410,242
Military, including river and harbor	32,154,143	37,082,736	38,070,883
Naval	17,325,301	14,554,935	18,964,310
Miscellan's, includ'g revenue collecting.	35,397,164	39,228,119	43,315,872
Interest	102,500,875	97,124,512	100,213,271
Total	\$236,964,327	\$233,660,008	\$316,990,530

These comparisons need little comment. The continuous decline in customs corresponds with the well-known decline in imports. The decline in internal revenue receipts (which were \$110,545,154 in 1874-5) is

not uniform, but only recent, after an increase during two years; it is by far the heaviest item of decline, that in customs being small, and is ascribed by the Secretary to the agitation about the proposed reduction of the tax on spirits and tobacco; nearly seven-eighths of the decline on internal revenue occurred on the former, and nearly one-eighth on the latter. As to other items, it is worth noting that after the two large accounts, customs and internal revenue, are taken from the schedule, the much-abused banks which grievously oppress "the people" pay to the people's treasury far the largest item, equalling 40 per cent of receipts other than the two above named; also, that this source of income is diminishing. The receipts for premium on coin sales, always on its merits an undesirable item, is diminishing, and, it is to be hoped, will never re-appear in a finance report. The only material increase in expenditures is in interest, and is readily intelligible as explained. Other items—particularly the military, which includes the river-and-harbor nuisance—show a reduction; and, although the decline in the figures of our national budget is not large, it is gratifying to note that steps towards a healthy economy, though short, are taken.

Of course, the interest of the report centres in what it says on the subject of resumption, to which the larger portion of space is given. A year ago, on the supposition that the legal tenders would be no more than 300 millions by next January, the reserve of 40 per cent, deemed necessary for resumption, was stated to be 120 millions; but, after the anti-contraction bill of last May, the reserve requirement was necessarily raised to 138 millions. At the end of 1877, the net available coin was 63 millions, of which 15 and 25 millions came from sales of 4½ and 4 per cent bonds respectively, the remaining 23 millions having accrued by surplus receipts. On the 11th of April, the memorable contract for 50 millions 4½s for purely resumption purposes was made, and the net proceeds, 50½ millions, have been paid in; 65 millions 4½s, and 30½ millions 4s, have been sold in all for resumption, and on November 23 the net coin reserve available was \$141,888,100, which will be somewhat reduced by interest payments on the 1st of January. Referring to the arrangements already announced between the Sub-Treasury and the banks here, for avoiding the friction of collections and working in harmony, the Secretary states, with truth, that every step in preparation for resumption has been accompanied with increased business and confidence; that the accumulation of coin, instead of increasing its price, as feared by many, has steadily reduced it; and that the present condition of trade and commerce, the ample reserves, and the general confidence inspired in our financial condition, seem to justify the opinion that we are prepared to commence and to maintain resumption on the 1st of January.

But many will very likely say that to begin resumption is easy; the difficulty will be in making it permanent. How, then, is the gold coin hoard to be maintained? We fully discussed this question two weeks since; but upon this important point the Secretary's own words will do him the fullest justice:

The power to sell any of the bonds described in the Refunding act continues after as well as before resumption. Though it may not be often used, it is essential to enable this department to meet emergencies. By its exercise it is anticipated that the Treasury at any time can readily obtain coin to reinforce the reserve already accumulated. United States notes must, however, be the chief means under existing law with which the department must restore coin and bullion when withdrawn in process of redemption. The notes, when redeemed, must necessarily accumulate in the Treasury until their superior use and convenience for circulation enables the department to exchange them at par for coin or bullion. * * * * *

The current receipts from the revenue are sufficient to meet the current expenditures, as well as the accruing interest on the public debt. Authority is conferred by the Refunding act to redeem 6 per cent bonds as they become redeemable, by the proceeds of the sale of bonds bearing a lower rate of interest. The United States notes redeemed under the Resumption act are, therefore, the principal means provided for the purchase of bullion or coin with which to maintain resumption, but should only be paid out when they can be used to replace an equal amount of coin withdrawn from the resumption fund. They may, it is true, be used for current purposes like other money, but when so used their place is filled by money received from taxes or other sources of revenue. In daily business, no distinction need be made between moneys from whatever source received, but they may properly be applied to any of the purposes authorized by law. No doubt, coin liabilities, such as interest or principal of the public debt, will be ordinarily paid and willingly received in United States notes, but, when demanded, such payments will be made in coin; and United States notes and coin will be used in the purchase of bullion. This method has already been adopted in Colorado and North Carolina, and arrangements are being perfected to purchase bullion in this way in all the mining regions of the United States.

To this statement nothing need be added but the remark that the acts of June 8 and July 19 last, authorize the receipts of gold coin or bullion on deposit, and the issue of certificates therefor, at any mint or assay office, and that these provisions will undoubtedly do much to draw into the Treasury the product of our mines, which, as the trade figures have repeatedly shown, has been staying at home of late instead of going abroad. The maintenance of the coin fund by the sale of bonds is, however, a quite different thing from maintaining it by the exchange of accumulated notes for coin, dollar for dollar. This last is the veritable parity of notes and coin, and of course the parity will maintain itself so long as it exists; but if it should cease to exist, the Treasury can no longer effect the even exchangeability of notes for coin wherewith to make good the depletion. Is it, therefore, quite exact to say that United States notes must be the chief means for keeping good the store of coin?

We have not space at present, nor is it necessary, to comment at length upon what Mr. Sherman says on the subject of silver. He gives no countenance to the idea of making room for the silver dollar by withdrawing small notes, but argues that in order to give practical effect to the presumed intention of Congress—providing a silver coin for many every-day uses without banishing the established gold coin of the country—it is indispensable to limit the silver coinage or else to make its bullion value equal to that of the gold dollar. Hence he argues, with a cogency which is unassailable, that the ratio of the silver dollar be changed or that a limit be set to the coinage, suggesting 50 millions as such limit; meanwhile he will redeem in this city, as directed by the Resumption Act, after January 1, all notes presented, "with either gold or silver coin, as desired by the holder, but reserving the legal option of the Government"—this option evidently meaning the reservation to pay silver if forced to do so by circumstances; and he will pay out notes for all demands whatever, unless the holder of coin liabilities demands coin. Inasmuch as alteration in the bullion value of the silver dollar, if attempted, would have to be, under present circumstances, renewedly made, the limitation of coinage is much the better course, and would answer the purpose nearly as well as the suspension of coinage we have already urged. But in saying that, "it appears from the recent Conference at Paris, invited by us, that other nations will not join us in fixing an international ratio, and that each country must adapt its laws to its own policy," it seems to us Mr. Sherman makes a statement broader than the facts warrant. We cannot enlarge upon this at present; but the real conclusion, in our view, to be drawn from the Paris meeting is simply

that the European nations singly, yet unanimously, declined to be drawn into trouble merely because this country had been guilty of rashness, and chose to stand back and see how we should get on in wrestling with the silver problem unaided, since we would insist on trying it.

If space permitted, attention would be due to other topics in the report, with regard to which the statements and facts are equally satisfactory and reassuring. We may, however, sum up the situation by citing the testimony of the *London Times*, which, commenting upon the meeting of Congress and the documents submitted, says: "Both abroad and at home the prospect is most encouraging, if the national finances could once more be established on a secure foundation. The dealings with the debt are satisfactory, and could the currency be brought back to a hard-money basis and cleared of the complications of silver coinage, there would be no reason to question the prediction that the United States are entering upon a new era of prosperity."

FINANCIAL REVIEW OF NOVEMBER.

November was a comparatively quiet month, and a more healthy tone prevailed in financial circles at home and abroad. There was a decided recovery in London, and on the 20th the Bank of England rate of discount was reduced to 5 per cent from 6, at which it had stood since October 14. In home affairs, by far the most important event was the occurrence of the general elections on the first Tuesday of the month, as the financial question had been made more prominent than any other issue, and the result of the elections was generally accepted as a present defeat of the inflation or repudiation element in politics. It must be conceded, however, that in some localities the greenback movement showed unexpected strength, and it would be a rose-colored view of the elections to conclude that henceforth opposition would be withdrawn to a return in good faith to specie payments, with a dollar which should pass at its par value in the markets of the world. The New York Clearing-House banks resolved to discontinue gold accounts after January 1, 1879, placing gold and greenbacks on a par, and to receive silver only as a special deposit. In writing of the possibilities of financial legislation at the present session of Congress, we recently summed up the contingencies substantially as follows, naming them in the order of their apparent probability:

1. That the currency laws, including the law for the coinage of silver, may remain substantially unchanged.
2. That the limitation on the coinage of silver may be removed, or the amount authorized per month largely increased; (or trade dollars made a legal tender).
3. That the silver law may be repealed, leaving gold as the only coin payable in amounts over \$5.
4. That greenbacks may be issued in place of national bank currency to be retired.
5. That the issue of unlimited greenbacks may be authorized for the payment of bonds and for great public works, &c.

There was a decided recovery in United States government securities and an active business in these and other investment bonds at the Stock Exchange, where the total transactions, compared with previous months, were as follows:

	August.	September.	October.	November.
U. S. Government bonds...	\$8,046,100	\$7,865,700	\$7,487,650	\$10,737,600
State bonds	411,000	58,000	411,400	751,910
Railroad bonds	4,856,000	5,171,100	7,163,400	12,673,600
Bank stocks	1,429	644	1,281	1,647
Railroad and miscel. stks. "	3,496,033	3,009,486	4,448,352	3,686,122

The following summary shows the condition of the New York Clearing-House banks, the premium on gold, rate of foreign exchange, and prices of leading securities and articles of merchandise, on or about the first of December in each year, from 1875 to 1878, inclusive:

* Prices bid. † Prices asked.

GOLD AND EXCHANGE.

There was very little interest in the gold market. Towards the close of the month the price advanced to 100 1/2, and higher prices were paid by borrowers.

Foreign exchange was more steady than in the previous month, and on 60-days' sterling bills the opening and closing prices of leading drawers were near the same figure. On short bills there was more difference, and at the close the asking price of drawers was 4.86 1/2, against 4.88 at the opening.

THE DEBT STATEMENT FOR NOV., 1878.

The following is the official statement of the public debt as appears from the books and Treasurer's returns at the close of business on the last day of November, 1878:

Debt bearing interest in coin.

Character of Issue.	Auth'izing Act.	When Payable	Interest Periods.	Bonds Outstanding.	
				Registered.	Coupon.
5s of 1868	June 14, '58	1874	J. & J. a	\$260,000	\$
6s of 1881	Feb. 8, '61	1880	J. & J. b	13,989,000	4,436,000
10s, Oregon War	March 2, '61	1881	J. & J. c		945,000
6s of 1881	July 4, '61	1881	J. & J. d	130,000,700	59,240,650
6s of 1881	March 3, '63	1881	J. & J. d	35,723,250	19,276,750
5s, 10-40's	March 3, '64	1904	M. & S. a	144,800,800	50,285,500
6s, 5-20s of 1865, new	March 3, '65	1865	J. & J. d	22,184,550	14,035,900
6s, 5-20s of 1867	March 3, '65	1887	J. & J. d	11,221,600	191,399,000
6s, 5-20s of 1868	March 3, '65	1888	J. & J. d	16,193,500	21,271,800
5s, Funded Loan, 1881	July 14, '70	1881	Q. - F. d	219,990,900	253,449,450
4 1/2s, do, 1891	July 14, '70	1891	Q. - M. d	1,255,900	87,144,200
4s, do, 1907	July 14, '70	1907	Q. - J. d	122,399,050	51,600,950
Aggregate of debt bearing interest in coin				1,031,361,550	\$764,389,300

* Coupons of \$50 and \$100 bonds are paid annually in March.

The sizes or denominations of each issue of bonds are as follows: (a) Coupon, \$1,000, registered \$5,000. (b) coupon \$1,000, registered \$1,000, \$5,000, \$10,000, (c) \$50, \$100 and \$500. (d) coupon, \$50, \$100, \$500 and \$1,000, registered, same as also \$5,000 and \$10,000.

On the above issues of bonds there is a total of \$4,371,103 of interest over-due and not yet called for. The total current accrued interest to date is \$25,251,432.

Debt Bearing Interest in Lawful Money.

	Principal.	Interest
3s, Navy pension, Act July 23, '68, Int. appl'd only to pens'ns	\$14,000,000	\$175,000

Debt on Which Interest Has Ceased Since Maturity.

There is a total amount of over-due debt yet outstanding, which has never been presented for payment, of \$23,661,210 principal and \$396,319 interest. Of this amount, \$22,937,700 are on the "called" five-twentieths.

Debt Bearing no Interest.

Character of Issue.	Authorizing Acts.	Issues.	Amount.	Total.
Old demand notes	July 17, '61 Feb. 12, '63			\$62,055
Legal-tender notes	Feb. 25, '62 July 11, '63 Mar. 3, '63	Prior to 1869 Series of 1869 Series of 1874 Series of 1875 Series of 1878	\$18,312,581 187,435,868 34,336,864 137,552,320 20,413,445	346,681,016

Central Branch, Union Pacific	1,608,000	1,069,808	71,445	967,302
Western Pacific	1,170,560	1,077,030	9,367	1,067,713
Sioux City and Pacific	1,623,320	975,801	83,643	862,152
Total	\$64,623,512	\$39,825,037	10,445,916	\$29,393,123

The Pacific Railroad bonds are all issued under the acts of July 1, 1862, and July 2, 1864; they are registered bonds in the denominations of \$

Department Reports.

REPORT OF THE SECRETARY OF THE TREASURY.

TREASURY DEPARTMENT,
WASHINGTON, D. C., Dec. 2, 1878.

SIR:—I have the honor to submit the following annual report:
The ordinary revenues, from all sources, for the fiscal year ending June 30, 1879, were—

From customs.....	\$130,170,630 80
From internal revenue.....	110,581,624 74
From sales of public lands.....	1,079,748 87
From tax on circulation and deposits of national banks.....	5,863,552 95
From repayment of interest by Pacific Railway Companies.....	1,366,934 36
From customs fees, fines, penalties, etc.....	1,046,884 86
From fees—consular, letters-patent and lands.....	2,056,515 13
From proceeds of sales of government property.....	249,469 88
From premium on sales of coin.....	317,102 30
From profits on coinage, etc.....	1,69,762 83
From miscellaneous sources.....	2,341,109 07

Total ordinary receipts.....\$257,763,873 70

The ordinary expenditures for the same period were—

For civil expenses.....	\$16,551,323 16
For foreign intercourse.....	1,224,216 78
For Indians.....	4,629,280 28
For pensions.....	27,127,019 08
For the military establishment, including river and harbor improvements and arsenals.....	32,154,147 85
For the naval establishment, including vessels, machinery, and improvements at navy yards.....	17,385,301 37
For miscellaneous expenditures, including public buildings, lighthouses, and collecting the revenue.....	35,397,163 63
For interest on the public debt.....	102,500,814 65

Total ordinary expenditures.....\$236,964,336 80

Leaving a surplus revenue of.....\$20,799,537 90

Which was applied as follows:

To the redemption of United States notes, etc.....	\$13,119,825 33
To the redemption of fractional currency.....	3,653,368 57
To the redemption of 6 per cent bonds for the sinking fund.....	73,950 00
To increase of cash balance in the Treasury.....	3,710,403 00

Total.....\$20,799,537 90

The amount due the sinking fund for the year was \$35,429,001 80, leaving a deficiency on this account of \$14,629,449 90.

Compared with the previous fiscal year, the receipts for 1878 have decreased \$11,934,796 09, in the following items: in customs revenue, \$785,812 87; in internal revenue, \$8,048,733 09; in semi-annual tax on banks, \$215,498; in sales of government property, \$84,485 08; in profits on coinage, \$1,582,476 75; and in miscellaneous items, \$1,267,740 30. There was an increase of \$748,088 17, as follows: in proceeds of sales of public lands, \$103,489 69; in premium on sales of coin, \$67,521 52; and in miscellaneous items, \$577,076 96—making a net decrease, in the receipts from all sources for the year, of \$11,236,707 92.

The decrease of revenue is principally due to the falling off in the receipts from internal revenue, which was probably caused by the agitation in Congress, for a long time, of the reduction of the tax on spirits and tobacco.

The expenditures show an increase of \$7,781,729 08, as follows: In the Navy Department, \$2,405,366 01, and in the interest on the public debt, \$5,376,363 07, the latter of which was due to the large balance of \$7,426,619 81 unpaid interest at the commencement of the year, and to the change from semi-annual to quarterly payments of interest on 6 per cent bonds converted into 4 per cents, which would not otherwise have been made until after the close of the year. There was a decrease of \$9,477,411 21, as follows: In the War Department, \$1,928,588 05; in the Interior Department, \$1,474,460 13; and in the civil and miscellaneous, \$3,074,363 03—making a net decrease in the expenditures of \$1,695,682 13.

FISCAL YEAR 1879.

For the present fiscal year the revenue, actual and estimated, will be as follows:

Receipts from—	For the quarter ended Sept. 30, 1878.	For remaining three-quarters of the year.
	Actual.	Estimated.
Customs.....	\$38,868,368 10	\$94,131,731 90
Internal revenue.....	28,572,144 46	86,437,855 84
Sales of public lands.....	260,765 63	789,254 37
Tax on circulation and deposits of nat. banks.....	3,338,519 04	8,381,480 97
Repayments of interest by Pac. R'lway Cos.....	397,137 10	992,362 90
Customs fees, fines, penalties, etc.....	244,833 93	705,166 07
Fees—consular, lett. patent and lands.....	502,990 76	1,441,119 24
Proceeds of sales of government property.....	41,127 11	204,872 49
Premium on sales of coin.....	5,441 23	44,753 77
Profits on coinage, etc.....	71,968 31	1,724,011 69
Miscellaneous sources.....	1,060,027 37	1,329,972 63
Total receipts.....	\$13,399,733 43	\$191,100,276 57

The expenditures for the same period, actual and estimated, will be:

Expenditures for—	For the quarter ended Sept. 30, 1878.	For remaining three-quarters of the year.
	Actual.	Estimated.
Civil and miscellaneous expenses, including public buildings, light-houses, and collecting the revenue.....	\$15,444,519 62	\$39,935,450 38
Indians.....	1,750,517 25	3,049,482 70
Pensions.....	7,893,465 63	21,497,534 27
Military establishment, including fortifications, river and harbor improvements, and arsenals.....	10,258,901 87	23,741,099 13
Naval establishment, including vessels, and machinery and improvements at navy yards.....	4,520,742 84	10,479,277 15
Interest on the public debt.....	31,967,407 06	63,032,572 94
Total ordinary expenditures.....	\$73,444,573 27	\$166,755,426 78

Total receipts, actual and estimated.....\$264,500,000
Total expenditures, actual and estimated.....240,100,000

Leaving a balance of.....\$24,400,000

—applicable to the sinking fund, which is estimated for the year at \$26,954,607 87.

FISCAL YEAR 1880.

The revenues of the fiscal year ending June 30, 1880, estimated upon existing laws, will be:

From customs.....	\$133,000,000 00
From internal revenue.....	115,000,000 00
From sales of public lands.....	1,000,000 00
From tax on circulation and deposits of national banks.....	6,750,000 00
From repayment of interest by Pacific Railway Companies.....	1,400,000 00
From customs fees, fines, penalties etc.....	1,100,000 00
From fees—consular, letters-patent and lands.....	2,000,000 00
From proceeds of sales of government property.....	250,000 00
From profits on coinage, etc.....	1,600,000 00
From miscellaneous sources.....	2,400,000 00

Total ordinary receipts.....\$264,500,000 00

The estimates of expenditures for the same period received from the several Executive Departments are as follows:

Legislative.....	\$2,583,169 28
Executive.....	13,146,092 63
Judicial.....	391,400 00
Foreign intercourse.....	1,178,830 00
Military establishment.....	21,335,727 33
Naval establishment.....	14,187,341 43
Indian affairs.....	4,593,214 20
Pensions.....	29,616,000 00
Public works:	
Treasury Department.....	4,217,516 65
War Department.....	7,601,781 50
Navy Department.....	375,000 00
Interior Department.....	422,717 94
Department of Justice.....	18,000 00
Department of Agriculture.....	6,210 00
Postal service.....	5,507,876 10
Miscellaneous.....	14,846,800 80
Permanent annual appropriations:	
Interest on the public debt.....	93,000,000 00
Sinking fund.....	38,802,333 26
Refunding—customs, internal revenue, lands, etc.....	4,675,900 00
Collecting revenue from customs.....	5,000,000 00
Miscellaneous.....	1,661,300 00

Total estimated expenditures, including sinking fund....\$275,137,250 94

Or an estimated deficit of.....\$10,637,250 94

Excluding the sinking fund, the estimated expenditures will be \$236,334,912 68, showing a surplus of \$23,165,087 32.

By direction of the President, the estimated expenditures for the next fiscal year have been based upon the appropriations made by Congress for the present fiscal year. The rule has been departed from only as to those branches of the public service belonging to departments the heads of which deem the estimated increase indispensable, or where existing law demands a greater sum than was appropriated. Such increase is estimated for as follows:

Legislative.....	\$115,198 11
Treasury Department.....	319,680 13
War Department.....	740,848 14
Navy Department.....	20,919 75
Interior Department.....	1,464,787 10
Post Office Department.....	1,658,701 38
Department of Justice.....	321,340 00

Less decrease in estimates for Department of State.....111,841 25

Net increase.....\$4,554,663 86

Eagerly desirous of co-operating with Congress in the reduction of expenditures to the lowest sum consistent with the proper execution of the law, the Secretary has reduced the expenses of the customs service, during the last fiscal year, compared with the previous year, in the sum of \$778,492 25, and herein recommends changes of the law which will enable him to make further reductions therein. The great body of expenditures is fixed by laws which leave no discretion to executive officers. The reduction of appropriations does not reduce expenditures when the law requires the service to be performed, or fixes the salary and number of employees. It must be accompanied by a careful revision of the laws, reducing the objects of expenditure, or the number or compensation of employees. It is believed that, by such a revision, especially of the postal laws, and by a limitation of the amount of appropriations for public works in progress, by the postponement of new works not indispensable for the public service, and by judicious scrutiny of disbursements, that the expenditures for the next fiscal year need not, in the aggregate, exceed the appropriations for the present fiscal year.

The estimate of revenue, based upon existing law, is \$6,736,121 30 more than the actual revenue of the past year. This estimate can only be realized by strict and impartial enforcement of the revenue laws. This is not only a legal duty of revenue officers, but is the right of every honest taxpayer. The enforcement of the tax on spirits and tobacco has, in some places, been resisted by formidable combinations too powerful for the department, with the forces at its command, to overcome. The customs duties, in many cases, have been evaded by smuggling, fraud, undervaluation, and false claims for drawbacks and damage allowance. Some of these obstructions are incident to the execution of any tax law; but many of them may be overcome by such modifications of the laws as are hereinafter recommended.

It is manifest, from these estimates, that, however desirable it may be to reduce existing taxes, it ought not now to be done except by supplying the reductions from other sources of revenue. Stability and certainty in the rate and subject of taxation are of great importance, and therefore the Secretary recommends that no change be made in them during the present session, except to convert certain ad valorem duties, hereinafter stated, into specific duties.

RESUMPTION OF SPECIE PAYMENTS.

The important duty imposed on this department by the resumption act, approved January 14, 1875, has been steadily pursued during the past year. The plain purpose of the act is to secure to all interests and all classes the benefits of a sound currency, redeemable in coin, with the least possible disturbance of existing rights and contracts. Three of its provisions have been substantially carried into execution by the gradual substitution of fractional coin for fractional currency, by the free coinage of gold, and by free banking. There remains only the completion of preparations for resumption in coin on the 1st day of January, 1879, and its maintenance thereafter upon the basis of existing law.

At the date of my annual report to Congress in December, 1877, it was deemed necessary as a preparation for resumption to accumulate in the Treasury a coin reserve of at least 40 per cent of the amount of United States notes outstanding. At that time it was anticipated that under the provisions of the resumption act the volume of United States notes would be reduced to \$300,000,000 by the 1st day of January, 1879, or soon thereafter, and that a reserve in coin of \$120,000,000 would then be sufficient. Congress, however, in view of the strong popular feeling against a contraction of the currency, by the act approved May 31, 1878, forbade the retirement of any United States notes after that date, leaving the amount in circulation \$346,681,016. Upon the principle of safety upon which the department was acting, that 40 per cent of coin was the smallest reserve upon which resumption could prudently be commenced, it became necessary to increase the coin reserve to \$133,000,000.

At the close of the year 1877 this coin reserve, in excess of coin liabilities, amounted to \$63,017,050 98, of which \$15,000,000 were obtained by the sale of 4 1/2 per cent, and \$25,000,000 by the sale of 4 per cent, bonds, the residue being surplus revenue. Subsequently, on the 11th day of April, 1878, the Secretary entered into a contract with certain bankers in New York and London—the parties to the previous contract of June 9, 1877, already communicated to Congress—for the sale of \$50,000,000 4 1/2 per cent bonds for resumption purposes. The bonds were sold at a premium of 1 1/2 per cent and accrued interest, less a commission of one-half of 1 per cent. The contract has been fulfilled, and the net proceeds, \$50,500,000, have been paid into the Treasury in gold coin. The \$5,500,000 coin paid on the Halifax award has been replaced by the sale of that amount of 4 per cent bonds sold for resumption purposes, making the aggregate amount of bonds sold for these purposes \$95,500,000, of which \$65,000,000 were 4 1/2 per cent bonds, and \$30,500,000 4 per cent bonds. To this has been added the surplus revenue from time to time. The amount of coin held in the Treasury on the 23d day of November last, in excess of coin sufficient to pay all accrued coin liabilities, was \$141,888,100, and constitutes the coin reserve prepared for resumption purposes. This sum will be diminished somewhat on the 1st of January next by reason of the large amount of interest accruing on that day in excess of the coin revenue received meanwhile.

In anticipation of resumption, and in view of the fact that the redemption of United States notes is mandatory only at the office of the Assistant Treasurer in the city of New York, it was deemed important to secure the co-operation of the associated banks of that city in the ready collection of drafts on those banks and in the payment of Treasury drafts held by them. A satisfactory arrangement has been made by which all drafts on the banks held by the Treasury are to be paid at the Clearing House, and all drafts on the Treasury held by them are to be paid to the Clearing House at the office of the Assistant Treasurer, in United States notes; and, after the 1st of January, United States notes are to be received by them as coin. This will greatly lessen the risk and labor of collections, both to the Treasury and the banks.

Every step in these preparations for resumption has been accompanied with increased business and confidence. The accumulation of coin, instead of increasing its price, as was feared by many, has steadily reduced its premium in the market. The depressing and ruinous losses that followed the panic of 1873 had not diminished in 1875, when the resumption act passed; but every measure taken in the execution or enforcement of this act has tended to lighten these losses and to reduce the premium on coin, so that now it is merely nominal. The present condition of our trade, industry and commerce—hereafter more fully stated—our ample reserves, and the general confidence inspired in our financial condition, seem to justify the opinion that we are prepared to commence and maintain resumption from and after the 1st day of January, A. D. 1879.

MEANS TO BE EMPLOYED.

The means and manner of doing this are left largely to the discretion of the Secretary, but, from the nature of the duty imposed, he must restore coin and bullion when withdrawn in the process of redemption, either by the sale of bonds, or the use of the surplus revenue, or of the notes redeemed from time to time.

The power to sell any of the bonds described in the refunding act continues after as well as before resumption. Though it may not be often used, it is essential to enable this department to meet emergencies. By its exercise it is anticipated that the Treasury at any time can readily obtain coin to reinforce the reserve already accumulated. United States notes must, however, be the chief means under existing law with which the department must restore coin and bullion when withdrawn in process of redemption. The notes, when redeemed, must necessarily accumulate in the Treasury until their superior use and convenience for circulation enables the department to exchange them at par for coin or bullion.

The act of May 31, 1878, already referred to, provides that when United States notes are redeemed or received in the Treasury un-

der any law, from any source whatever, and shall belong to the United States, they shall not be retired, cancelled or destroyed, but shall be reissued and paid out again and kept in circulation.

The power to reissue United States notes was conferred by section 3579, Revised Statutes, and was not limited by the resumption act. As this, however, was questioned, Congress wisely removed the doubt.

Notes redeemed are like other notes received into the Treasury. Payments of them can only be made in consequence of appropriations made by law, or for the purchase of bullion, or for the refunding of the public debt.

The current receipts from revenue are sufficient to meet the current expenditures, as well as the accruing interest on the public debt. Authority is conferred by the refunding act to redeem 6 per cent bonds, as they become redeemable, by the proceeds of the sale of bonds bearing a lower rate of interest. The United States notes redeemed under the resumption act are, therefore, the principal means provided for the purchase of bullion or coin with which to maintain resumption, but should only be paid out when they can be used to replace an equal amount of coin withdrawn from the resumption fund. They may, it is true, be used for current purposes like other money, but when so used their place is filled by money received from taxes or other sources of revenue.

In daily business, no distinction need be made between moneys from whatever source received, but they may properly be applied to any of the purposes authorized by law. No doubt coin liabilities, such as interest or principal of the public debt, will be ordinarily paid and willingly received in United States notes, but, when demanded, such payments will be made in coin; and United States notes and coin will be used in the purchase of bullion. This method has already been adopted in Colorado and North Carolina, and arrangements are being perfected to purchase bullion in this way in all the mining regions of the United States.

By the act approved June 8, 1878, the Secretary of the Treasury is authorized to constitute any superintendent of a mint or assayer of any assayer office an Assistant Treasurer of the United States to receive gold coin or bullion on deposit. By the legislative appropriation bill approved July 19, 1878, the Secretary of the Treasury is authorized to issue coin certificates in payment to depositors of bullion at the several mints and assay offices of the United States. These provisions, intended to secure to the producers of bullion more speedy payment, will necessarily bring into the mints and Treasury the great body of the precious metals mined in the United States, and will tend greatly to the easy and steady supply of bullion for coinage. United States notes, when at par with coin, will be readily received for bullion instead of coin certificates, and with great advantage and convenience to the producers.

Deposits of coin in the Treasury will, no doubt, continue to be made after the 1st of January, as heretofore. Both gold and silver coin from its weight and bulk will naturally seek such a safe deposit, while notes redeemable in coin, from their superior convenience, will be circulated instead. After resumption the distinction between coin and United States notes should be, as far as practicable, abandoned in the current affairs of the government; and therefore no coin certificates should be issued, except where expressly required by the provisions of law, as in the case of silver certificates. The gold certificates hitherto issued by virtue of the discretion conferred upon the Secretary will not be issued after the 1st of January next. The necessity for them during a suspension of specie payments is obvious, but no longer exists when by law every United States note is, in effect, a coin certificate. The only purpose that could be subserved by their issue hereafter would be to enable persons to convert their notes into coin certificates and thus contract the currency and hoard gold in the vaults of the Treasury without the inconvenience or risk of its custody. For convenience, United States notes of the same denomination as the larger coin certificates will be issued.

By existing law, customs duties and the interest of the public debt are payable in coin, and a portion of the duties was specially pledged as a special fund for the payment of the interest, thus making one provision dependent upon the other. As we cannot, with due regard to the public honor, repeal the obligation to pay coin, we ought not to impair or repeal the means provided to procure coin. When, happily, our notes are equal to coin, they will be accepted as coin, both by the public creditor and by the government; but this acceptance should be left to the option of the respective parties, and the legal right on both sides to demand coin should be preserved inviolate.

UNITED STATES NOTES FOR CUSTOMS DUTIES.

The Secretary is of the opinion that a change of the law is not necessary to authorize this department to receive United States notes for customs duties on and after the 1st day of January, 1879, while they are redeemable and are redeemed on demand in coin. After resumption it would seem a useless inconvenience to require payment of such duties in coin rather than in United States notes. The resumption act, by clear implication, so far modifies previous laws as to permit payments in United States notes as well as in coin. The provision for coin payments was made in the midst of war, when the notes were depreciated and the public necessities required an assured revenue in coin to support the public credit. This alone justified the refusal by the government to take its own notes for the taxes levied by it. It has now definitely assumed to pay these notes in coin, and this necessarily implies the receipt of these notes as coin. To refuse them is only to invite their presentation for coin. Any other construction would require the notes to be presented to the Assistant Treasurer in New York for coin, and, if used in the purchase of bonds, to be returned to the same officer, or, if used for the payment of customs duties, to be

carried to the Collector of Customs, who must daily deposit in the Treasury all money received by him. It is not to be assumed that the law requires this indirect and inconvenient process after the notes are redeemable in coin on demand of the holder. They are then at a parity with coin, and both should be received indiscriminately.

If United States notes are received for duties at the port of New York, they should be received for the same purpose in all other ports of the United States, or an unconstitutional preference would be given to that port over other ports. If this privilege is denied to the citizens of other ports, they could make such use of these notes only by transporting them to New York and transporting the coin to their homes for payment; and all this not only without benefit to the government, but with a loss in returning the coin again to New York, where it is required for redemption purposes.

The provision in the law for redemption in New York was believed to be practical redemption in all parts of the United States. Actual redemption was confined to a single place, from the necessity of maintaining only one coin reserve, and where the coin could be easily accumulated and kept.

With this view of the resumption act, the Secretary will feel it to be his duty, unless Congress otherwise provides, to direct that after the 1st day of January next, and while United States notes are redeemed at the Treasury, they be received the same as coin by the officers of this department in all payments in all parts of the United States.

If any further provision of law is deemed necessary by Congress to authorize the receipt of United States notes for customs dues or for bonds, the Secretary respectfully submits that this authority should continue only while the notes are redeemed in coin. However desirable continuous resumption may be, and however confident we may feel in its maintenance, yet the experience of many nations has proven that it may be impossible in periods of great emergency. In such events the public faith demands that the customs duties shall be collected in coin and paid to the public creditors, and this pledge should never be violated or our ability to perform it endangered.

Heretofore, the Treasury, in the disbursement of currency, has paid out bills of any denomination desired. In this way the number of bills of a less denomination than five dollars is determined by the demand for them. Such would appear to be the true policy after the 1st of January. It has been urged that, with a view to place in circulation silver coins, no bills of less than five dollars should be issued. It would seem to be more just and expedient not to force any form of money upon a public creditor, but to give him the option of the kind and denomination. The convenience of the public in this respect should be consulted. The only way by which moneys of different kinds and intrinsic values can be maintained in circulation at par with each other is by the ability, when one kind is in excess, to readily exchange it for the other. This principle is applicable to coin as well as to paper money. In this way the largest amount of money of different kinds can be maintained at par, the different purposes for which each is issued making a demand for it. The refusal or neglect to maintain this species of redemption inevitably effects the exclusion from circulation of the most valuable, which thereafter becomes a commodity, bought and sold at a premium.

THE SILVER COINAGE.

When the resumption act passed, gold was the only coin which by law was a legal tender in payment of all debts. That act contemplated resumption in gold coin only. No silver coin of full legal tender could then be lawfully issued. The only silver coin provided was fractional coin, which was a legal tender for \$5 only. The act approved February 28, 1878, made a very important change in our coinage system. The silver dollar provided for was made a legal tender for all debts, public and private, except where otherwise expressly stipulated in the contract. The amount of this coin issued will more properly be stated hereafter, but its effect upon the problem of resumption should be here considered.

The law itself clearly shows that the silver dollar was not to supersede the gold dollar; nor did Congress propose to adopt the single standard of silver, but only to create a bi-metallic standard of silver and gold, of equal value and equal purchasing power. Congress, therefore, limited the amount of silver dollars to be coined to not less than two millions nor more than four millions per month, but did not limit the aggregate amount nor the period of time during which this coinage should continue. The market value of the silver in the dollar, at the date of the passage of the act, was 93½ cents in gold coin. Now it is about 86 cents in gold coin. If it was intended by Congress to adopt the silver instead of the gold standard, the amount provided for is totally inadequate for the purpose. Experience, not only in this country, but in European countries, has established that a certain amount of silver coin may be maintained in circulation at par with gold, though of less intrinsic bullion value. It was, no doubt, the intention of Congress to provide a coin in silver which would answer a multitude of the purposes of business life, without banishing from circulation the established gold coin of the country. To accomplish this it is indispensable either that the silver coin be limited in amount, or that its bullion value be equal to that of the gold dollar. If not, its use will be limited to domestic purposes. It cannot be exported except at its commercial value as bullion. If issued in excess of demands for domestic purposes, it will necessarily fall in market value, and, by a well-known principle of finance, will become the sole coin standard of value. Gold will be either hoarded or exported. When two currencies, both legal, are authorized without limit, the cheaper alone will circulate. If, however, the issue of the silver dollars

is limited to an amount demanded for circulation, there will be no depreciation, and their convenient use will keep them at par with gold, as fractional silver coin, issued under the act approved February 21, 1853, was kept at par with gold.

The amount of such coin that can thus be maintained at par with gold cannot be fairly tested until resumption is accomplished. As yet paper money has been depreciated, and silver dollars, being receivable for customs dues, have naturally not entered into general circulation, but have returned to the Treasury in payment of such dues, and thus the only effect of the attempt of the department to circulate them has been to diminish the gold revenue. After resumption these coins will circulate in considerable sums for small payments. To the extent that such demand will give employment to silver dollars, their use will be an aid to resumption rather than a hindrance; but if issued in excess of such demand they will at once tend to displace gold and become the sole standard, and gradually, as they increase in number, will fall to their value as bullion. Even the fear or suspicion of such an excess tends to banish gold, and, if well established, will cause a continuous drain of gold until imperative necessity will compel resumption in silver alone. The serious effects of such a radical change in our standards of value cannot be exaggerated; and its possibility will greatly disturb confidence in resumption, and may make necessary larger reserves and further sales of bonds.

The Secretary, therefore, earnestly invokes the attention of Congress to this subject, with a view that either during the present or the next session the amount of silver dollars to be issued be limited or their ratio to gold for coining purposes be changed.

RELATIVE VALUES OF GOLD AND SILVER.

Gold and silver have varied in value from time to time in the history of nations, and laws have been passed to meet this changing value. In our country, by the act of April 2, 1792, the ratio between them was fixed at one of gold to fifteen of silver. By the act of June 28, 1834, the ratio was changed to one of gold to sixteen of silver. For more than a century the market value of the two metals had varied between these two ratios, mainly resting at that fixed by the Latin nations, of one to fifteen and a half.

But we cannot overlook the fact that within a few years, from causes frequently discussed in Congress, a great change has occurred in the relative value of the two metals. It would seem to be expedient to recognize this controlling fact—one that no nation alone can change—by a careful readjustment of the legal ratio for coinage of one to sixteen, so as to conform to the relative market values of the two metals. The ratios heretofore fixed were always made with that view, and, when made, did conform as near as might be. Now that the production and use of the two metals have greatly changed in relative value, a corresponding change must be made in the coinage ratio. There is no peculiar force or sanction in the present ratio that should make us hesitate to adopt another, when, in the markets of the world, it is proven that such ratio is not now the true one. The addition of one-tenth or one-eighth to the thickness of the silver dollar would scarcely be perceived as an inconvenience by the holder, but would inspire confidence and add greatly to its circulation. As prices are now based on United States notes at par with gold, no disturbance of values would result from the change.

It appears from the recent conference at Paris, invited by us, that other nations will not join with us in fixing an international ratio, and that each country must adapt its laws to its own policy. The tendency of late among commercial nations is to the adoption of a single standard of gold and the issue of silver for fractional coin. We may, by ignoring this tendency, give, temporarily, increased value to the stores of silver held in Germany and France until our market absorbs them; but by adopting a silver standard as nearly equal to gold as practicable, we make a market for our large production of silver, and furnish a full, honest dollar that will be hoarded, transported or circulated without disparagement or reproach.

It is respectfully submitted that the United States, already so largely interested in trade with all parts of the world, and becoming, by its population, wealth, commerce and productions, a leading member of the family of nations, should not adopt a standard of less intrinsic value than other commercial nations. Alike interested in silver and gold, as the great producing country of both, it should coin them at such a ratio and on such conditions as will secure the largest use and circulation of both metals without displacing either. Gold must necessarily be the standard of value in great transactions, from its greater relative value, but it is not capable of the division required for small transactions; while silver is indispensable for a multitude of daily wants, and is too bulky for use in the larger transactions of business, and the cost of its transportation for long distances would greatly increase the present rates of exchange. It would, therefore, seem to be the best policy, for the present, to limit the aggregate issue of our silver dollars, based on the ratio of sixteen to one, to such sums as can clearly be maintained at par with gold, until the price of silver in the market shall assume a definite ratio to gold, when that ratio should be adopted, and our coins made to conform to it; and the Secretary respectfully recommends that he be authorized to discontinue the coinage of the silver dollar when the amount outstanding shall exceed \$50,000,000.

The Secretary deems it proper to state that in the meantime, in the execution of the law as it now stands, he will feel it to be his duty to redeem all United States notes presented on and after January 1, next, at the office of the Assistant Treasurer of the United States, in the city of New York, in sums of not less than

\$50, with either gold or silver coin, as desired by the holder, but reserving the legal option of the government; and to pay out United States notes for all other demands on the Treasury, except when coin is demanded on coin liabilities.

It is his duty as an executive officer to frankly state his opinions, so that if he is in error Congress may prescribe such a policy as is best for the public interests.

FUNDING.

The amount of 4 per cent bonds sold during the present year, prior to November 23, is \$100,270,900, of which \$94,770,900 were sold under the refunding act approved July 14, 1870. Six per cent bonds, commonly known as five-twenties, to an equal amount, have been redeemed, or will be redeemed as calls mature. This beneficial process was greatly retarded by the requirement of the law that subscriptions must be paid in coin, the inconvenience of obtaining which, to the great body of the people outside of the large cities, deterred many sales. This will not affect sales after resumption, when bonds can be paid for with United States notes. The large absorption of United States securities in the American market, by reason of their return from Europe, together with the sale of 4½ per cent bonds for resumption purposes, tended to retard the sale of 4 per cent bonds. As, from the best advices, not more than \$300,000,000 of United States bonds are now held out of the country, it may be fairly anticipated that the sale of 4 per cent bonds hereafter will largely increase.

Prior to May, 1877, United States bonds were mainly sold through an association of bankers. Experience proves that under the present plan of selling to all subscribers on terms fixed by public advertisement, though the aggregate of sales may be less, their distribution is more satisfactory. Under a popular loan the interest is paid at home, and the investment is available at all times, without loss, to meet the needs of the holder. This policy has been carefully fostered by other nations, and should be specially so in ours, where every citizen equally participates in the government of his country. The holding of these bonds at home, in small sums well distributed, is of great importance in enlisting popular interest in our national credit, and in encouraging habits of thrift; and such holding in the country is far more stable and less likely to disturb the market than it would be in cities, or by corporations, where the bonds can be promptly sold in quantities.

The three months' public notice required by the fourth section of the refunding act to be given to the holders of the five-twenty bonds to be redeemed, necessarily involves a loss to the government by the payment of double interest during that time. The notice should not be given until subscriptions are made or are reasonably certain to be made. When they are made and the money is paid into the Treasury, whether it is kept there idle during the three months, or deposited with national banks under existing law, the government not only pays interest on both classes of bonds during the ninety days, but, if the sales are large, the boarding of large sums may disturb the market. Under existing law this is unavoidable, and to mitigate it the Secretary deemed it expedient during the last summer to make calls in anticipation of subscriptions; but this, though legal, might, in case of failure of subscriptions, embarrass the government in paying called bonds. The long notice required by law is not necessary in the interest of the holder of the bonds, for, as the calls are made by public notice and the bonds are indicated and specified by class, date and number, in the order of their numbers and issue, he, by ordinary diligence, can know beforehand when his bonds in due course will probably be called, and will not be taken by surprise.

The Secretary therefore recommends that the notice to be given for called bonds be, at his discretion, not less than ten days nor more than three months. In this way he will be able largely to avoid the payment of double interest, as well as the temporary contraction of the currency, and may fix the maturity of the call at a time when the interest of the called bonds becomes due and payable.

SAVINGS.

It has been the desire of the department to popularize the public loans and bring them within easy reach of every citizen who desires to invest his savings, whether small or great, in these securities. The popular loan of 1877, open to all alike by public advertisement, absorbed \$75,000,000 of 4 per cent bonds, and during the present year these bonds have been sold in the same manner.

It is believed that without a change of existing law the sale of these bonds will largely increase, but it would appear advisable so to modify the law that smaller sums may be invested from time to time through popular subscriptions, and that through the post offices, or other agents of the government, the freest opportunity may be given in all parts of the country for such investments.

The best mode suggested is, that the department be authorized to issue certificates of deposit of the United States of the denomination of \$10, bearing interest at the rate of 3-65 per cent per annum, and convertible at any time within one year after their issue into the 4 per cent bonds authorized by the refunding act, and to be issued only in exchange for United States notes sent to the Treasury by mail or otherwise. Such a provision of law, supported by suitable regulations, would enable any person readily, without cost or risk, to convert his money into an interest bearing security of the United States, and the money so received could be applied to the redemption of 6 per cent bonds. The Secretary therefore recommends the prompt passage of such a law.

PUBLIC MONEYS.

The monetary transactions of the government have been con-

ducted without loss through the offices of the Treasurer, ten Assistant Treasurers, one depository, and 119 national-bank depositories, exclusive of those designated to receive only loan subscriptions.

Of the entire receipts of the government, during the year, there was deposited in national-bank depositories the amount of \$99,781,053 48.

Deposits received by the bank depositories are secured by a pledge of United States bonds held by the Treasurer, and are paid out, from time to time, as the convenience of the public service may require, or transferred by the bank, without expense to the government to an independent treasury office.

By an act approved March 3, 1857, public disbursing officers were required to place all public funds intrusted to them for disbursement on deposit with a public depository, and to draw for the same only in favor of the persons to whom payment was to be made, excepting that they might check in their own names, when the payments did not exceed \$20.

The enforcement of this provision, according to its letter, was found impracticable, and the attention of Congress was called to it in the annual reports of the Secretary for 1857 and 1858, with a recommendation for its modification.

No action in the matter appears to have been taken by Congress until the act of June 14, 1866, reproduced as section 3620, Revised Statutes, was passed. This appeared to supersede the act of 1857 in removing the restrictions as to the method in which the money was to be drawn, but by an act approved February 27, 1877, section 3,620 has been amended by requiring the checks to be drawn only in favor of the persons to whom payments are to be made.

The object which the law evidently seeks to accomplish meets the entire approval of the department, but to carry its provisions into effect would require paymasters in the Army to draw their checks in favor of the soldiers to be paid by name, and paymasters on naval vessels, even during absences for years from the United States, to pay the officers and men only by drawing checks in their favor on depositories in the United States.

The same embarrassment extends to all public disbursements, and the attention of Congress is called to the matter, with the recommendation that the section be so amended that disbursements may be made under regulations to be prescribed by the Secretary of the Treasury.

NATIONAL BANKS.

The report of the Comptroller of the Currency presents full and interesting information as to the national banks. The number in existence on October 1 was 2,053. The amount of their circulating notes outstanding, including those in liquidation, was \$323,147,719; the capital invested was \$466,147,436; the surplus fund and profits were \$157,833,993; the loans and discounts were \$630,521,542.

This system of banks, though of recent growth and adopted as an experiment amid the necessities developed by the civil war, has, under wise management, become the most important business agency in the country. Though still under trial and subject at all times to the discretion of Congress to discontinue and limit its existence and operations, it may be fairly claimed, as already established by experiment, that the system possesses certain advantages over any other heretofore existing in this country, and possible only with a national system.

First—The security of the bill-holder from loss through failure of the bank.

Second—The rapidity and certainty of the detection and prevention of counterfeiting, from the fact that the notes are engraved, printed and redeemed at the Treasury Department.

Third—The frequent and careful examination of the banks, and the publication of the detailed statements of their condition.

Fourth—Uniformity and free circulation of the notes throughout the United States, without respect to the place of their issue.

Fifth—The admirable provisions by which failing banks are placed in liquidation, and their assets cheaply and promptly applied to the payment of creditors.

These, and other advantages, derived to the public from a national system of banks over a State system, seem to be fully demonstrated, and, though irksome and apparently hard to the banks, are a benefit and security to the stockholders, and a safeguard to the public.

The only franchise conferred by this system, that cannot be freely enjoyed by private bankers under State law, is the power to issue circulating notes. This, it is conceded, is a franchise conferred by the government; but it is not in the nature of a monopoly. It may be exercised by any five persons who have the means, and will comply with the law.

Whether the power to issue circulating notes should be granted to private corporations, or be exercised only by the government, is purely a question of public policy and public interest. In behalf of a circulation issued by the government, it is claimed that interest is saved to the public on the full amount of the notes issued. To this it is replied that the issue of such notes necessarily involves their redemption in coin, and this can be secured only by coin reserves and the ordinary machinery of banks. If the banks issue notes, they expect to derive a profit from their loan; but this profit is diminished by the burden of redemption, by the large taxes imposed upon the franchise, and by the risk always incident to the issue of circulating notes. These are considerations which will, no doubt, enter into the question of the permanency of the national-banking system; but as the banks of this system are each organized, under the law, for twenty years, and none of them expire until June, 1893, it is respectfully submitted that it is good policy to continue the experiment until that date, when the public mind will be better prepared to consider the questions involved.

COINS AND COINAGE.

The annual report of the Director of the Mint exhibits in detail the operations of the several Mints and Assay offices, and also presents interesting information relative to the production of gold and silver in the United States, the estimated amount of gold and silver coin and bullion in the country, the depreciation of silver, the position of the American trade dollar in the Oriental trade, and other subjects connected directly or indirectly with the coinage.

The value of the gold coinage executed during the last fiscal year was.....	\$52,798,980 00
Of trade dollars.....	11,578,010 01
Of standard silver dollars.....	8,573,500 00
Of fractional silver coin.....	8,339,315 50
And of minor coin.....	30,694 00

A total coinage of \$81,120,499 50

In addition to the coinage, fine and unparted bars were prepared for depositors in the amount of \$12,501,926 23 in gold and \$11,854,385 87 in silver.

It is manifest, from the proven capacity of the several mints, that our coinage facilities are ample for all purposes.

The present production of bullion from the mines of the United States appears to approximate \$100,000,000 in value. All the gold bullion produced in the country contains more or less silver, and the greater portion of the silver bullion from our mines contains a percentage of gold, making it difficult to determine with accuracy the proportion of each. It is safe, however, to state that the production of the two metals, calculated at their coining rates, is nearly equal.

During the year 1877 and the first few months of the present year, trade dollars, to the number of probably 4,000,000, were placed in circulation in the States east of the Rocky Mountains, with a full knowledge on the part of the parties engaged in the business that the coin was not a legal tender.

This coin is in no sense money of the United States which the government is bound to redeem or care for. The government stamp upon it is to certify to its weight and fineness for the convenience of dealers in silver bullion. It is precisely like any other silver bullion assayed at any assay office or mint. The limited legal tender quality originally given to it was taken away before any of the coins were put into domestic circulation, and it should not now be given any value or attribute at the expense of the public that is not incident to any other silver bullion. The government has received no benefit from this coinage, and has neither received it nor paid it out. The whole connection of the government with this bullion was to perform the mechanical work of assaying it and dividing it into convenient form for the merchant, at his cost and for his benefit, for exportation only.

Recent advices from our Minister to China indicate that a considerable amount of trade dollars is now being hoarded in that empire, and will be returned to us if a discrimination is made in their favor over other bullion. No distinction can be made between trade dollars in the United States and those out of the United States; but, if deemed at all, they must all be redeemed alike. The bullion in 35,853,360 trade dollars outstanding can now be purchased from our miners for \$31,256,950. It would be a manifest injustice to deprive them of our market for their bullion, in order to discriminate in favor of bullion coined for exportation and held chiefly in foreign countries.

At times the fractional coins of the United States accumulate at certain places and are wanted at others. It is recommended that this department be authorized to redeem them in United States notes when presented in sums of \$100, or any multiple thereof, at the Mint at Philadelphia, where they can be recoined, if necessary, and distributed.

The amount of gold coin and bullion in the country September 30, is estimated by the director at \$259,353,399, and of silver coin and bullion at \$99,090,557—a total of \$358,443,947.

The estimating of the production of the precious metals in this country, and of the amount of coin and bullion, is a matter attended with great difficulties, and the estimates can only be regarded as approximately correct, though they have been compiled from the best attainable sources.

By reason of the acts authorizing this department to purchase gold and silver bullion at the several mints and assay offices, its transportation is thrown upon the government. The great body of the bullion accumulates in San Francisco and Carson, and the chief transportation is from those places to New York. Efforts were made to secure favorable rates, but the lowest offer was 3-10 of 1 per cent for gold, and 1 2-10 per cent for silver, which was deemed to be excessive. Silver coin and bullion can be transported with but little risk, while at the rate proposed for transporting a car containing \$250,000, or about eight tons, the cost would be \$3,000. The chief cost is in the transportation over the Central and Union Pacific Railroads, both largely indebted to the United States. It is respectfully submitted that the rate over these roads be prescribed by Congress, and that the proceeds form part of the sinking fund of said railroads, provided by law.

BUREAU OF ENGRAVING AND PRINTING.

At the close of the last fiscal year there was an unexpended balance of \$652,836 17 of the appropriation for labor and other expenses of this bureau. Of this amount, in accordance with the act approved June 20, 1878, the sum of \$327,536 50 will be expended in the purchase of a site for and the erection of a fire-proof building for the bureau, the work on which is now progressing satisfactorily, and will probably be completed during the fall of 1879. It is assumed, from the action of Congress at its last session, that it holds that the engraving and printing of the public securities can be more cheaply, perfectly, and safely done in this bureau than in private establishments, and the Sec-

retary has therefore directed that all work of this description, except certain proprietary stamps, shall be done therein. The cost of the work is less than one-half the prices previously paid.

After careful inquiry, it has been ascertained that the prices paid for the paper used for public securities are greatly in excess of its cost, and proposals have been invited for the manufacture of a suitable paper, of a distinctive character, for this purpose, no action upon which has yet been taken.

[Remarks with regard to "Disbursements of the Commissioners of the District of Columbia," and "Claims," are omitted.]

DUTIES ON IMPORTS.

The embarrassments alluded to in the last annual report, in regard to the collection of duties on sugar, have not ceased. Seizures have been made of cargoes of sugar claimed to be artificially colored for the purpose of reducing the duties at the Custom House, and a suit involving one of these cases was tried at Baltimore at great expense to the government and to the importers, and was recently concluded, the verdict being that the sugars were artificially colored after the process of manufacture was completed, but that it was not proven that the importer of the sugars had a knowledge thereof at the time of making entry. Though the claim of the government, that the sugars had been artificially colored for the purpose of defrauding the revenue, is maintained, it is powerless, under the anti-moisture act of June 22, 1874, to enforce fines, penalties and forfeitures, against persons or property, unless there is proof of guilty knowledge of fraud.

It is deemed imperative that some change in the mode of collecting duties on sugar should be had, and it is preferred, as stated in the last report, that the duty should be at one rate on all sugars, up to a point which will exclude temptation either to color sugar for the purpose of reducing the duty, or to commit fraud by means of sampling and classification. The duties now are, to a large extent, dependent upon the fidelity of the sampler, one of the lowest paid officers in the public service.

In the event that duties upon sugars are made dependent to any considerable extent upon color by the Dutch standard, it is recommended that authority be given to this department to ascertain the true saccharine strength of imported sugars by means of the polariscope, and that the relations between the color of sugars and their saccharine strength be definitely prescribed by Congress.

In this connection, the attention of Congress is called to the operations of the Reciprocity Treaty between Hawaii and the United States, concluded January 30, 1875.

The value of goods shipped from the United States to Hawaii for the year ended December 31, 1875 (the year before the treaty went into operation), was.....	\$917,360
And for the year ended December 31, 1877.....	1,762,805

Excess in 1877 over 1875.....	\$815,515
The duties surrendered by virtue of the treaty on goods imported into the United States for the year ended December 31, 1877, were.....	811,306
Difference between duties remitted by the United States in 1877, and value of excess of imports in 1877 over 1875.....	\$15,661

So that we have surrendered duties in an amount greater than the entire excess of exports in 1877 over those of 1875.

Of the duties thus surrendered in 1877, \$716,732 was on sugars alone. The advantages have thus far not been reciprocal, but, as has been shown, have been largely in favor of Hawaii, and it is probable that the benefits in favor of Hawaii will increase largely.

While not recommending a general revision of the tariff at the present time, it is deemed important that upon some articles the ad valorem duties now assessed should be converted into specific duties. As a rule, specific duties are to be preferred to either ad valorem or compound rates, and, in any future revision of the tariff, it is hoped that Congress will give preference to this system of imposing duties, as far as practicable. The argument in favor of specific duties applies with great force to kid gloves, concerning the value of which, under the present ad valorem duties, serious differences of opinion have occurred between the importers and the government during the past year, which have led to protracted delays in the ascertainment of the dutiable value, and consequent injury to the mercantile community.

While it may not be practicable to frame a specific duty which would be entirely equitable upon all classes of leather gloves, it is believed that such specific rates of duty can be levied as, while yielding as much revenue as the present rate based upon the market value, will make a just distinction between the higher and lower grade of gloves, and avoid the uncertainty and contention produced by the present duty.

The subject of specific duties upon silk piece goods is also commended to the consideration of Congress. The efforts of the department to collect duties on silks upon such a basis of value as shall meet the demands of the present law have not been attended in all cases with success. The law contemplates the assessment of duty on the market value or wholesale price, and presupposes a price at which any person in the ordinary course of trade may purchase the goods. European manufacturers of silks consign their goods to agents in this country for sale, and no sales for shipment to the United States are made in the open foreign market of such goods. Consequently, there is no basis upon which their dutiable value can be ascertained.

It is believed that invoices of goods consigned to the United States for sale are, as a rule, undervalued, and that by such consignments the trade in silks and kid gloves is kept within the control of a small number of commission importers, while the mass of American importers are excluded therefrom. This faulty system has had the effect, if not so designed, largely to defraud the revenue, and to enable the few who control the business to invoice their goods at the lowest rates, and to command the highest rates from purchasers.

The adoption of specific duties would place the importer who

purchases in the foreign market and the manufacturer who ships his goods on consignment upon an equal footing at the Custom House, and obviate the difficulties in collecting the revenue on this class of goods.

Examinations made during the past year by the officers of this department have led to the conviction that the present provisions of law, allowing abatements of duties on account of damage to imported merchandise on the voyage of importation, are neither, upon the whole, equitable to the importer, nor just to the government. The extent of such damage on many classes of goods can only be conjectured; and it has been alleged that larger allowances have been made at some ports than at others, on goods of the same class, which occupy about the same time in transit from the foreign market.

The repeal of all laws allowing damage upon the voyage of importation, would place all persons upon an equal footing, as loss by damage can be guarded against by prior insurance. There is reason to believe that the larger importing houses of the United States would gladly favor such a measure, and its adoption is therefore recommended.

The continued experience of this department during the past year, has justified the recommendation made in the last report, in favor of such a change in the law as will offer increased inducements to parties who may be able to secure a knowledge of frauds upon the customs revenue to bring it to the attention of the customs officers.

The pecuniary inducements which this department has been able to offer, under existing laws, have not been sufficient to induce parties to make active efforts to search out such frauds, and bring the offenders to punishment. The Secretary does not recommend a return to the system which prevailed prior to the passage of the so-called anti-moisture act of June 22, 1874, so far as that system conferred large emoluments upon officers of the government; but he is satisfied that additional legislation is necessary in order to place within the control of this department the machinery necessary to develop proof of frauds, which, under any system of customs duties, are likely to arise.

There appears to be a necessity for the adoption of some measure by Congress to secure greater efficiency and uniformity in appraisements of imported merchandise.

Under the present system, each local appraiser is independent, and has no knowledge of the action taken by appraisers at other ports upon the articles which he is called upon to appraise. It thus occurs that the values found at the various ports are not at all times uniform upon the same class of goods. It is also a matter of frequent occurrence that merchandise is classified under one rate of duty at one port, while at other ports it is entered by a different name, and subjected to a different rate of duty. A bill will be prepared and submitted to the proper committee of Congress to remedy this and other defects in the present machinery for collecting the customs revenue.

Every possible effort has been made during the past year to reduce the expenses of collecting the revenue from customs, with the result already stated. There are many customs districts, however, which might be abolished, and in which the interests of the government could be well protected by subordinate officers connected with the more important districts in the same region of country, and with considerable saving of expense.

Under section 253 of the Revised Statutes, the Secretary of the Treasury may discontinue any port of delivery, the revenue received at which does not amount to the sum of \$10,000 a year. It is recommended that authority be given, also, to abolish ports of entry where the receipts do not amount to the sum specified, placing subordinate officers, if necessary, at such ports, to be attached to other collection districts; or to consolidate two or more districts, should it be found desirable.

Attention is called to the report of the Chief of the Special Agents, showing the nature and character of the duties performed by them during the past year. The importance of this service is manifested in the economy and efficiency produced by the efforts of these agents, who, being generally familiar with the customs service, are able to discover and check irregularities, and to detect and prevent frauds.

[Remarks with regard to "Alaska" are omitted.]

EXPORTS AND IMPORTS.

The gold values of the exports of merchandise from the United States, and imports of merchandise into the United States, during the last fiscal year, as appears from returns made to and compiled by the Bureau of Statistics, are as follows:

Exports of domestic merchandise.....	\$681,709,268
Exports of foreign merchandise.....	14,153,492
Total exports of merchandise.....	\$695,862,760
Imports of merchandise.....	497,061,534
Excess of exports over imports of merchandise.....	\$198,801,226

Compared with the previous year, the importations are less by \$14,271,594, and the exportations greater by \$92,390,546.

The annual average of the excess of imports over exports of merchandise, for the ten years ended June 30, 1873, was \$104,706,922; but during the last three years there has been an excess of exports over imports as follows: in 1876, \$79,643,481; in 1877, \$151,152,094; and in 1878, \$198,801,226.

The total amount of exports and imports of specie and bullion, during the last fiscal year, has been as follows:

Exports of specie and bullion.....	\$33,740,125
Imports of specie and bullion.....	29,821,314
Excess of exports over imports.....	\$3,918,811

The importation of specie and bullion was less than for the

preceding year by \$10,953,100, and the exportation less than for the preceding year by \$23,432,112.

The excess of such exports over imports has decreased from \$71,231,425, in 1875, to \$3,918,811, in 1878, as above stated.

The excess of exports over imports of merchandise during the first four months of the current fiscal year amounted to \$81,415,477, and during the corresponding months of the last fiscal year to only \$34,295,076.

During the first four months of the last fiscal year, there was an excess of exports over imports of coin and bullion amounting to \$343,787, whereas, during the first four months of the current fiscal year, there has been an excess of imports over exports of coin and bullion amounting to \$3,355,882, making a change in this respect of \$6,786,669.

The total gold value of exports of domestic merchandise, from the United States, has increased from \$269,389,900, in 1868, to \$680,709,268, in 1878—an increase of 153 per cent.

With one or two unimportant exceptions, the United States stands alone among the commercial nations of the globe with respect to the excess of exports over imports.

The increase in our exports consisted mainly of breadstuffs, provisions, agricultural implements, iron and manufactures of iron, copper and manufactures of copper, manufactures of cotton, leather and manufactures of leather, and petroleum.

The exportation of the manufactured articles referred to increased from \$14,287,486, in 1868, to \$27,250,882, in 1878.

Many highly wrought products of American manufacture, previously exported in very small quantities, or not at all, now find profitable markets in foreign countries, and certain of these commodities are now being exported to countries from which, a few years ago, they were largely imported into the United States.

Many branches of industry are now feeling the quickening influences of a foreign demand, and the possibility of successfully competing in the markets of the world with some of our older commercial and manufacturing rivals is a source of the highest encouragement and of confidence in the future.

Of the exports of domestic merchandise during the year, the products of agriculture comprised 77 per cent, and exceeded the entire value of our imports of all classes of merchandise from foreign countries.

The exports of these products have risen from \$368,852,972, in 1872, to \$536,039,931, in 1878, and the capacity for their further increase would seem to be limited only by the demand therefor.

In connection with the increase of our exports, attention is invited to the decrease of our imports of merchandise from \$642,136,210 for 1873, when they reached their maximum, to \$437,051,532 for 1878—a decrease of \$205,084,678.

This decrease of imports consisted chiefly of manufactures of cotton, flax and silk, of wool and manufactures of wool, and of iron and steel and manufactures thereof.

Of the latter, the importation of railroad-bars of iron and steel decreased from 595,321 tons, in 1873, to 12 tons, in 1878; but their product in the United States increased from 2,938,141 tons, during the five years from 1867 to 1871, to 4,056,340 tons, during the five years from 1873 to 1877, and from this product has been supplied the demand for such bars necessary for the extension and renewal of railroads, of which there are in operation seventy-nine thousand miles.

INTERNAL REVENUE.

The receipts from the several sources of taxation under the Internal Revenue laws for the fiscal years ended, respectively, June 30, 1877, and June 30, 1878, are shown in the following tabular statement:

Sources.	1877.	1878.	Increase.	Decrease.
Spirits.....	\$37,459,429 72	\$50,420,815 80	\$12,961,386 08	\$7,088,613 9
Tobacco.....	41,106,546 92	40,091,754 67	1,014,792 2	
Fermented liquors.....	9,480,789 17	9,937,051 78	456,262 61	
Banks and bankers.....	3,829,729 33	3,482,031 85		337,697 48
Penalties, &c.....	419,999 41	646,007 55	226,008 14	73,991 86
Adhesive stamps.....	6,453,439 15	6,380,405 18		73,033 97
Back taxes under repealed laws.....	258,360 55	429,658 71	171,298 16	
Total.....	\$118,995,184 35	\$111,097,725 49	\$6,897,458 86	\$8,545,119 53

The amount of collections exhibited in the foregoing table includes commissions on sales of stamps, paid in kind, as well as certain sums collected, but not deposited, during their respective fiscal years. An apparent discrepancy is thus caused between the amounts of collections given in the table and those shown by the covering warrants of the Treasury.

By comparing the internal revenue for the fiscal year terminated in June last with that for the fiscal year ended June 30, 1877, it will be seen that there has been a decrease during the past year of nearly eight millions of dollars, and that of this amount upwards of seven millions arose in the collection of spirits, owing to causes which have been already adverted to.

The needs of the public service require that no reduction of internal revenue taxes be made. The commodities from which the internal revenue is mostly collected, namely, spirits, tobacco, fermented liquors and stamps, are those which properly bear the burden of the tax; and the present rates are, in the main, equitable and satisfactory, and to them the trade in those commodities has become adjusted. Any change in these rates, or agitation of change, disturbs the course of business and is prejudicial both to dealers and the revenue. Stability in the rates of taxation is, in view of the present condition of the country, especially desirable.

The number of collectors is at present 126.

COMMERCE AND NAVIGATION.

The total tonnage of vessels of the United States is 4,212,764 tons, a decrease of 29,836 tons from that of the fiscal year ended June 30, 1877. The following table exhibits the total tonnage for the last two years:

	1877.		1878.	
	Vessels.	Tons.	Vessels.	Tons.
Registered, engaged in foreign trade.	2,958	1,611,193	3,077	1,629,047
Enrolled and licensed, engaged in domestic commerce.	22,398	2,631,407	22,327	2,533,717
Total.	25,356	4,242,600	25,404	4,212,764

The decrease in the total tonnage is exhibited in the following table:

	Increase.	Number.	Tons.
Vessels built.		1,378	235,504
Wrecked and rebuilt.		1	185
Balance (absolute decrease).		122	21,836
	Decrease.	1,281	265,545
Sold to foreigners.		133	43,707
Lost at sea.		760	165,147
Abandoned.		463	56,195
Loss by re-admeasurement and vessels not documented.		10	176
		1,381	265,545

The tonnage of vessels built is about 33 per cent in excess of that of last year.

By reference to the foregoing table, it will be seen that the excess of the losses of tonnage by wrecks, sales to foreigners and other causes, over the gains by building, amounts to 29,836 tons. On the other hand, the increase of tonnage in vessels built is about 30 per cent over that of last year. But the number of vessels built includes only such as have been documented, and does not embrace vessels built and sold to foreigners without registration.

The vessels built during the year ended June 30, 1878, are classed as follows:

	Number.	Tonnage.
Sail vessels.	134	106,067.51
Steam vessels.	34	81,359.10
Enrolled canal-boats.	19	1,908.50
Barges.	373	45,638.96

The discrimination between boats and barges not propelled by sail or steam, which arises from the operation of the act of April 18, 1874, still continues to exist, to the great embarrassment of the department. Under the construction which it has been considered necessary to give to this statute, one class of barges that are partially employed in the internal waters of a State is exempt from enrollment and license, while other vessels of similar structure, employed exclusively on the navigable waters of the United States, are required to be enrolled and licensed.

This discrimination is pernicious and should not be permitted to exist. But I see no practical remedy for it other than by restricting the issue of enrollments and licenses to vessels propelled by sail or steam. A bill to that effect has already received the favorable consideration of one branch of Congress.

The total number of entries of vessels into ports of the United States from foreign countries, as returned by the Bureau of Statistics, during the year ended June 30, 1878, was 30,796; of these entries, 10,594 were of American vessels; the total number of clearances foreign, during the same time, was 31,364; of this number 10,872 were clearances of American vessels. Of the total tonnage thus entered, about 25 per cent was American and 75 per cent foreign; of the total number of clearances foreign, about 26 per cent was American, and 74 per cent foreign.

[Remarks with regard to "Steamboat Inspection" and "Revenue Marine" are omitted.]

OFFICIAL SERVICE.

In closing his annual report, the Secretary deems it proper to call attention to the great variety of jurisdiction imposed by law upon the Treasury Department. Since its organization, by act approved September 2, 1789, it has been placed in charge of the commerce and navigation of the country; of a revenue marine, consisting of thirty-seven steam and sailing vessels, engaged in the prevention of smuggling and the assistance of distressed and wrecked vessels; of the engraving, printing and redemption of United States notes; of the collection of commercial and other statistics, and of the construction and custody of public buildings. It has also the exclusive supervision of the National Banks, of the Lighthouse Establishment, the Coast Survey, the Life-Saving Service and the Marine Hospital Service—together constituting a diversity of duties requiring the highest skill, learning, fidelity and enterprise on the part of its officers. The laws relative to these matters have been supplemented by regulations and decisions, and all combined form an admirable system for the administration of the business of the department. It will, accordingly, be seen that the collection and disbursement of public revenues, and the settlement of the accounts therefor, constitute a small part of the work of the department, and it would seem proper that the persons performing duties so varied and important should have a tenure of office terminable only for cause, as is the case in the army and navy, and that provision be made for increased pay as a reward for long-continued and faithful service.

The general conduct of the officers of this department has been exemplary, and probably no service presents a better record of responsible trusts faithfully and honestly discharged.

The several reports of the heads of bureaus and divisions are herewith respectfully submitted.

JOHN SHERMAN, Secretary of the Treasury.

To Hon. SAMUEL J. RANDALL,
Speaker of the House of Representatives.

REPORT OF THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, D. C., November 30, 1878.

I have the honor to submit for the consideration of Congress the sixteenth annual report of the Comptroller of the Currency, in compliance with section three hundred and thirty three of the Revised Statutes of the United States. This section provides that the Comptroller shall make annually a report to Congress, at the commencement of its session, exhibiting—

1st—A summary of the state and condition of every association from which report have been received during the preceding year, at the several dates to which such reports refer, with an abstract of the whole amount of banking capital returned by them, of the whole amount of their debts and liabilities, the amount of circulating notes outstanding, and the total amount of means and resources, specifying the amount of lawful money held by them at the time of their several returns, and such other information in relation to such associations as, in his judgment, may be useful.

2d—A statement of the associations whose business has been closed during the year, with the amount of their circulation redeemed and the amount outstanding.

3d—Any amendment to the laws relative to banking by which the system may be improved and the security of the holders of its notes and other creditors may be increased.

This section further provides that a statement shall be prepared by the Comptroller, exhibiting, under appropriate heads, the resources and liabilities and condition of the banks, banking companies and savings banks organized under the laws of the several States and Territories, such information to be obtained by the Comptroller from the reports made by such banks, banking companies and savings banks to the legislatures or officers of the different States and Territories; and where such reports cannot be obtained, the deficiency to be supplied from such other authentic sources as may be available.

This last provision became a law by act of February 19, 1873, but, owing to the defective legislation of the several States, it has thus far been found impracticable to procure reliable statistics showing the condition of all the banks organized under State laws. All private bankers and banking associations, however, of whatever nature other than national, are required by law, for purposes of taxation, to make semi-annual returns to the Commissioner of Internal Revenue of the average amount of their capital and deposits. From these returns the following table has been compiled in this office, exhibiting in a concise form, by geographical divisions, the total average capital and deposits of all State and savings banks and private bankers in the country, for the six months ending May 31, 1878:

Geographical divisions.	State banks and trust companies.			Private bankers.			Savings banks with capital.			Savings B'ks without capital.		
	Number.	Capital.	Deposits.	Number.	Capital.	Deposits.	Number.	Capital.	Deposits.	Number.	Capital.	Deposits.
N. Eng'd States	42	\$ 8 19	\$ 15 06	71	\$ 2 36	\$ 3 3	10	\$ 1 7	\$ 1 14	44	\$ 408 43	
Middle States	217	\$ 2 45	\$ 122 10	916	\$ 31 4	\$ 61 94	30	\$ 1 6	\$ 1 37	190	\$ 358 68	
Southern States	233	\$ 27 38	\$ 30 67	285	\$ 7 3	\$ 13 65	40	\$ 8 8	\$ 1 28	3	\$ 2 14	
Western States and Territories.	361	\$ 46 38	\$ 61 65	1,539	\$ 33 1	\$ 105 00	152	\$ 12 12	\$ 22 39	34	\$ 29 05	
United States	853	\$ 121 35	\$ 221 48	2,556	\$ 77 80	\$ 183 83	233	\$ 2 2	\$ 36 18	168	\$ 803 30	

The capital of the 2,056 national banks in operation on June 29, 1878, as will be seen by a subsequent table, was \$470,393,366, not including surplus, which latter fund amounted at that date to more than 118 millions; while the average capital of all the State banks, private banks and savings banks having capital stock, for the six months ending May 31 previously, was, as seen below, but \$205,382,832; which amount is considerably less than one-half that of the national banks. The net deposits of the national banks were \$677,159,298, while the average deposits of all other banks and bankers, including savings banks, were \$1,242,794,903. The average deposits for the same period of 668 savings banks having no capital stock were \$893,299,345.

The table below exhibits the aggregate average capital and deposits for the period named of all banks other than national, together with the capital and deposits of the national banks on June 29 following:

Geographical divisions.	State banks, savings banks, private bankers, &c.			National banks.			Total.		
	No.	Capital.	Deposits.	No.	Capital.	Deposits.	No.	Capital.	Deposits.
N. England States.	553	\$ 11 12	\$ 422 88	512	\$ 166 52	\$ 128 83	1,065	\$ 177 64	\$ 551 69
Middle States	1,326	\$ 77 09	\$ 144 07	1,341	\$ 177 18	\$ 4 89	2,667	\$ 254 27	\$ 918 96

From this table it will be seen that the total number of banks and bankers in the country at the dates named was 6,456, with a total banking capital of \$675,776,198, and total deposits of \$1,919,954,201.

The total number of national banks organized from the establishment of the national banking system, on February 25, 1863, to November 1 of the present year is 2,400. Of these, 273 have gone into voluntary liquidation by vote of shareholders owning two-thirds of their respective capitals, and 74 have been placed in the hands of receivers for the purpose of closing up their

affairs, leaving 2,053 in existence on November 1 of this year. Included in the aggregate number organized are nine national gold banks, located in the State of California, which redeem in gold coin their circulating notes at their places of issue and in the city of San Francisco. These have an aggregate capital of \$4,800,000, and an aggregate circulation of \$1,468,920.

During the past year twenty-eight banks have been organized, with an authorized capital of \$2,775,000, to which \$1,598,800 in circulating-notes has been issued. Fifteen banks have failed within this period, having an aggregate capital of \$2,712,500, and forty-one banks, with a total capital of \$5,200,000, have voluntarily discontinued business.

The following table exhibits the resources and liabilities of the banks at the close of business on the first day of October, 1878—the date of their last report; the returns from New York, from Boston, Philadelphia and Baltimore, from the other reserve cities, and from the remaining banks of the country, being tabulated separately.

THE NATIONAL-BANKING SYSTEM.

The Comptroller, in his report for 1876, in addition to the usual national-bank statistics, gave an historical sketch of the two banks of the United States, and also of the several State systems of banking, with tables showing, by geographical divisions and by States, so far as they could be obtained from official sources, the resources and liabilities of the State banks from the earliest dates to the date of the organization of the national system, together with a comparative view of the State and national systems of banking.

In his report to Congress for the year 1875, he sketched the origin and growth of the national-banking system, and answered the principal arguments advanced against its continuance. The establishment of the system was not advocated in the interest of any political party, and it has been free from the control of partisan or sectional influence, its benefits being now open to all who desire to engage in the business of banking. The opportunity occasioned by a great war was seized upon, in the interest of the government, to get rid of a circulation issued by authority of many different States, which had been, almost from the beginning of the government, a grievous tax upon the business and the commerce of this country. It was shown, from the discussions in Congress at the time of the passage of the legal-tender act, from the reports of this department, and from the uniform legislation since that time, that the national-banking

system was intended to be permanent, the institutions organized under it being, by the express terms of the law, authorized to continue for a term of twenty years; while it was equally evident that the Treasury notes issued and still in circulation were intended to be funded, to constitute a temporary currency, issued from necessity, and to furnish the government with the means to save itself from destruction; that the amount was not to be increased, but to be withdrawn from circulation as rapidly as possible.

It was further shown that the system was not a monopoly, its privileges being free to all, but that it uprooted many real banking monopolies authorized by the several States, and which had been in existence almost from the foundation of the government; that the profits upon circulation were small, and that the earnings of the banks were not too great a compensation for the risks incident to the business of banking, to which capital loaned directly on mortgage security is not subject; that the taxation imposed upon the banks is unequaled in the history of monetary institutions; that the losses by failures had been insignificant in proportion to the liabilities; and that the losses on circulation had not been one dollar; that the restrictions of the act are such as experience has shown to be necessary for the success of great banking systems; that publicity is one of the principal features of the national system; that a surplus of more than one hundred millions of dollars—equal to one-fourth of the capital, and derived largely from profits accruing from transactions during the war—had accumulated, and remained as a security to stockholders and depositors during times of revulsion and panic.

This report, which, since its publication, has been constantly in demand, is out of print. The proposition for the substitution of Treasury notes in place of national-bank notes having been again revived and discussed, it is thought advisable again to answer the principal objections urged against the national-banking system, even at the risk of repeating to some extent, although with more recent data, what has already appeared in previous reports.

The chief reasons urged in favor of the substitution of Treasury notes for national-bank notes are, that the banks in the national system are a favored class, enjoying special privileges at the cost of the people; that they derive a large profit from the issue of circulating notes; and that a large amount of money may be saved to the government by authorizing it to issue all the paper currency of the country.

Before the passage of the act of June 20, 1874, no national bank could reduce its circulation and take up its bonds except by returning a proportionate amount of its own circulating notes, and these were usually difficult to obtain; and prior to the act of January 14, 1875, the total amount of circulation authorized to be issued was limited to 354 millions. But these acts provided both for a reduction of circulation and withdrawal of bonds at the pleasure of the banks, upon a deposit by them of lawful money in sums of not less than \$9,000, and for an issue of bank notes to any association organized in conformity with law. Under the law, then, as it now stands, any number of persons not less than five, in any part of the country, who together may have \$50,000 of capital at command, may organize a national bank and receive circulating notes equal in amount to 90 per cent of such capital—the law discriminating in the latter respect only against the large institutions, as no bank organized since the passage of the act of July 12, 1870, is entitled to circulation in excess of \$500,000. A bank organized prior to that time, and having a capital of between \$500,000 and \$1,000,000, can receive in circulating notes but 80 per cent thereon; if between \$1,000,000 and \$3,000,000, it can receive but 75 per cent; and if over \$3,000,000, but 60 per cent.

Since the passage of the act of June 20, 1874, the national banks, so far from considering the privilege of issuing circulation a profitable monopoly, have voluntarily surrendered \$66,237,323 of their notes, which is \$29,463,437 more than has been issued to all of the banks organized since that date, while 144 banks, with capital stock amounting to \$15,517,000, and a circulation of \$9,190,718, have gone into voluntary liquidation.

The capital stock of the national banks is not largely in the hands of capitalists. Among their shareholders may be found persons in every station of life, and great numbers of women and children rely for their support upon the successful management of these institutions. The elaborate tables which appeared in the Comptroller's report for 1876 showed that there were then only 767 persons anywhere who held as much as \$50,000 each of national-bank stock; that more than one-half of the whole number of shareholders in these associations held, each, but \$1,000, or less, of such stock; and that, taking the whole number of shareholders together, the average amount held by each one was but \$3,100. Of shareholders owning not more than \$1,000 each, there were 32,235 in Massachusetts alone, 12,784 in New York, 14,621 in Pennsylvania, 1,441 in Kentucky, 2,388 in Ohio, 1,608 in Illinois, 832 in Georgia and 617 in Virginia. Of those holding the stock in amounts ranging between \$2,000 and \$3,000 there were 17,743 in the New England States, 15,614 in the Middle States, 2,305 in the Southern States and 3,422 in the Western States. Moreover, citizens of the Western States held 26,455 shares, and citizens of the Southern States 13,319 shares, of the stock of banks located in the Eastern and Middle States. It is not probable that the stock of any other class of corporations in the country is more widely distributed among people of moderate means than is that of the national banks. It is also largely distributed among members of all political parties, and, as a rule, is free from the control of partisan influence.

The national banks have not at any time monopolized the business of banking, nor do they at the present time. On May 31 of this year there were in existence more than 3,700 State banks and private banking houses, having an aggregate capital of 202

millions of dollars, and deposits of 413 millions. These banking establishments are located in all of the principal cities and villages of the country, and it is to be presumed that if the privilege of issuing circulating notes were so great as it is persistently claimed to be, these associations and individuals, who are already engaged in the business of banking, and who are free to enter the national system, would hasten to organize under that system.

The amount of interest accruing annually upon the bonds held by the national banks on November 1—less the tax paid by them upon their circulation—is \$14,544,692 only, while the annual profit upon the entire circulation of the national banks, as will be shown in another place in this report, is but \$8,961,519, or less than two and one-half per centum upon their capital. As the 3,700 banks and bankers mentioned still continue to transact their business as State banks or private associations, it seems very clear that this annual profit of \$2,500 only upon a capital of \$100,000, does not present to them, or any of them, a sufficient inducement to transfer their business to the national system. The reason is obvious. The laws governing the national banks contain numerous and burdensome restrictions, and impose many and severe penalties for their violation. On the one hand they authorize the issue of circulating notes, but on the other hand they require that the business of banking shall be conducted under a uniform system, which insures the greatest possible degree of safety to the depositor and bill-holder and prompt and certain convertibility to the circulating note. If, on the one hand, the right to issue circulating notes is given, on the other, wholesome restraints are insisted upon as a condition of that privilege. These legal prohibitions and restrictions, which are the compensations that the public receive from these corporations in return for their right to issue circulating notes, are too numerous to be given here in detail. But it is proposed now to notice specially some of the more important of the restrictions.

* * * * *

CAPITAL STOCK.

One of the most important requirements of the national bank act is that the capital stock of all institutions organized thereunder shall be fully paid in. The organization of banks without capital was one of the great abuses of previous banking systems. The history of banking in this country is full of instances of institutions of this character, which were not only permitted to receive deposits and transact a general banking business, but were authorized to issue circulating notes; and to the frequent failures of these associations may be attributed, in a great degree, the prejudice still existing in this country against all banking corporations.

When the national system was established, especial care was exercised in the framing of the banking act, not alone to insure the safety and convertibility of the circulating notes, but also to guard against the organization of banks without *bona fide* capital. At least fifty per cent of the capital stock of a national bank must be paid in before it can be authorized to commence business, and the remainder must be thereafter paid in installments of not less than one-fifth monthly, the payment of each installment being certified to this office, under oath, by the president or cashier of the association.

It is frequently stated, and it seems to be believed by many, that banks of circulation only may be organized under the act—that is, that a bank may use its circulating notes either to increase its existing capital or to assist in organizing other banks without real capital. The law carefully guards against such an abuse. In the first place, as has been already stated, the officers and directors are required at the outset to certify under oath to the Comptroller the amount of stock which has been paid into the bank as permanent capital, while subsequent installments must be similarly certified. In addition to this, section 5203 of the Revised Statutes provides that "no association shall, either directly or indirectly, pledge or hypothecate any of its notes of circulation for the purpose of procuring money to be paid in on its capital stock, or to be used in its banking operations or otherwise; nor shall any association use its circulating notes, or any part thereof, in any manner or form to create or increase its capital stock." The Comptroller is also authorized to examine every banking association before granting it authority to commence business, in order to ascertain whether or not its capital has been actually paid in. It is impossible, therefore, for a bank of circulation only, without capital, to be organized under the national system, if proper precaution be exercised and the examiner is competent and faithful in the performance of his duty. * * *

The proportion of capital, and of capital and surplus, to liabilities is much greater in this country than elsewhere, which is undoubtedly owing to the fact that our law requires that the full amount of authorized capital shall be actually paid in. In England, as a rule, only a portion of the capital is paid in, but the stockholders are individually liable for the full amount of their subscriptions. This restricted liability is true of the limited banks only, the stockholders of other corporations not limited being each liable for all of the debts of the corporation. * * *

CONVERTIBILITY OF THE NOTE.

Previous to the passage of the national bank act, the circulating notes of banks located elsewhere than in New York or New England were not redeemable except at the counters of the issuing banks. As only about one-third of the circulation of the country consisted of New York and New England notes, it may be said that the remaining two-thirds had practically no general system of redemption. The legislation of the New England States provided only for redemption at the counter, although what was known as the Suffolk system compelled redemption in the city of Boston also. The New York law required redemption

at the counter at par, and also in New York, Albany or Troy at one-fourth of 1 per cent discount. The New England currency, therefore, consisted of unsecured notes, redeemable at par at the place of issue and in the city of Boston, while the New York currency was a secured note, redeemable at par at its counter, and at a discount at its agency. The notes of the national banks constitute the only secured circulation ever required by law to be redeemed at par at a central agency, as well as at their place of issue.

If the New York system of redemption were to be applied to the national bank circulation, in place of the existing method, it would probably at once raise the price of exchange to the rate current under that system, which was generally one-half of one per cent. The Suffolk system was excellent, as a voluntary arrangement entered into by 500 banks, having an aggregate circulation of fifty millions only, and all located within the comparatively moderate area of the six New England States; but it would not be a practicable one if extended to more than 2,000 banks, distributed, as are the national banks, throughout all the States of the Union, and having a circulation more than six times as great as that of the New England banks. So large a volume of circulating notes, issued at points so remote from each other, could not be made uniformly convertible by the legislative action of separate States, nor by the agency of individual corporations. Congressional action alone is adequate to accomplish this; and accordingly full provision was made by Congress for the convertibility of the national bank circulation, by providing for its redemption at par, both at its place of issue and at the Treasury of the United States. For the latter purpose the banks are, by a late act, required to keep on deposit with the Treasurer an amount of lawful money equal to five per cent of their circulation.

At the time of the passage of the last-named act a very large proportion of the notes of the national banks was in a worn and mutilated condition; but within eighteen months thereafter more than \$248,000,000 in such notes were received at the Treasury for redemption. For this amount about \$177,000,000 of new currency was issued by the Comptroller to replace the mutilated portion, the remainder, which was fit for circulation, being returned to the banks.

In transmitting national bank notes to the Treasury for redemption, they may be sent unassorted, that is, without reference to denominations or banks of issue, the only restriction being that they shall be presented in sums of \$1,000 or a multiple thereof, while the only expense to the sender is the cost of transportation to the place of redemption. Under this system the notes of the national banks, wherever located, have possessed a uniform value, and the prices of exchange have ruled at the lowest rate. The rates of exchange between St. Louis, Cincinnati, Chicago and New York have been frequently at par and under, never exceeding, say, 75 cents for \$1,000, instead of from ten to fifteen dollars per thousand, as was common under previous systems. Redemptions have not been so frequent under this as under the previous systems of New York and New England, for the reason that the notes are more fully secured, and also because the demand for Treasury notes has not been so great as was formerly the demand for gold under similar circumstances. The machinery of the law is, however, in operation, and the frequency of redemptions will, to a great extent, depend upon the demand for gold after specie payment shall have been resumed. But the notes of the banks being secure beyond peradventure, this demand will, in all probability, be much less than under former systems of unsecured currency.

PROFITS AND LOSSES.

The law provides that no association shall, during the time it continues its banking operations, withdraw or permit to be withdrawn, in dividends or otherwise, any portion of its capital, and that no dividend shall ever be made to an amount greater than the net profits then on hand, deducting therefrom losses and bad debts. With these restrictions, the banks are permitted to declare dividends semi-annually from their net profits, but are also required, before making any such dividend, to carry to surplus fund one-tenth part of their net profits of the preceding half-year, until this fund shall equal twenty per cent of their capital stock. The law thus designates three uses for the profits of the national banks: First, for building up a surplus fund; second, to protect the capital stock from impairment by losses in business, by the use of such fund when the other profits are insufficient; and, third, for the declaration of dividends out of any remaining profits. As a rule, the banks in the national system have not made excessive dividends. In determining the true ratio of their profits, their accumulated surplus, as well as what is technically known as capital, must be considered, as it is from the use of both capital and surplus that their profits are derived. Even during the most prosperous years of the system, the ratio of annual earnings to the combined capital and surplus of the banks was not greatly in excess of the usual legal rates of interest in the States where they were located, while during the last two years this ratio has been less than six per cent on the combined capital and surplus.

The surplus of the national banks amounted on October 1 to nearly \$117,000,000. A part of this sum represents the profits earned by former State banks previous to their conversion into national organizations, and brought by them into the system. The greater portion was, however, accumulated by the banks during the years of business prosperity immediately succeeding the close of the war. The following table exhibits the amount of surplus held by the banks on or near the 1st day of January and July in each year since 1863, as shown by their reports for the dates nearest thereto, together with the semi-annual increase or decrease therein:

Dates.	Surplus.		Dates.	Surplus.	
	Amount.	Semi annual increase or decrease.		Amount.	Semi annual increase or decrease.
July 4, 1864	\$ 1,129,910	Increase.	Dec. 16, 1871	\$ 101,573,154	Increase.

July 6, 1868	75,840,119	5,253,993	Dec. 17, 1875	133,085,422	Decrease.
Jan. 4, 1869	81,169,937	5,329,818	June 30, 1876	131,297,191	\$83,673
July 12, 1869	81,215,575	1,048,639	Dec. 23, 1876	131,390,665	1,083,225
Jan. 22, 1870	90,174,251	7,955,705	June 22, 1877	124,714,073	5,06,532
July 9, 1870	91,659,584	1,515,553	Dec. 28, 1877	121,563,435	6,676,502
Dec. 28, 1870	94,785,740	3,015,906	June 29, 1878	118,173,531	3,145,618
June 10, 1871	98,312,204	3,616,464			3,349,924

It will be seen that the maximum surplus was reached in June, 1875, and that there has since then been a gradual diminution of this fund. The diminution has been caused by charging thereto, from time to time, portions of the losses sustained by the national banks, such losses aggregating, during the last three years, the large sum of \$64,119,415.

The total losses thus charged off equal nearly fourteen per cent of the entire capital of the banks. Although the charging up of losses has very considerably reduced the surplus of the banks, yet, if the total losses incurred had been wholly charged to this fund, it would have been still more largely diminished. The greater portion of the losses mentioned has been cancelled by charging it to the account of current profits, in consequence of which 357 banks, with an aggregate capital of \$58,736,950, have, in the last six months, paid no dividends at all; while during the last three years the average number of banks semi-annually passing dividends on account of losses has been 288. This number is equal to about one-seventh of the whole number now in operation. The average amount of capital upon which no dividends have been paid during that time is \$14,583,515; from which it follows that, for a continuous period of three years, more than one-tenth of the total capital of the national banks has been without profit to its owners. This is exhibited in the following table.

Geographical divisions.	Six months ending—				Average for the year.	
	March 1, 1878.		Sept. 1, 1878.			
	No.	Capital.	No.	Capital.	No.	Capital.

Totals for 1878	328	48,797,900	337	58,736,950	343	53,767,425
Totals for 1877	315	40,452,000	288	41,166,800	266	40,801,100
Totals for 1876	335	34,390,320	273	41,057,725	251	39,174,042
Average for three years	299	41,160,073	306	47,986,958	288	44,583,515

Many of the banks, also, which have declared dividends within the last three years have done so wholly or in part out of profits other than surplus previously accumulated by them, and not out of their current earnings.

The following table shows by geographical divisions the ratio to capital and surplus of the dividends declared by all the national banks during the last nine years:

Geographical divisions.	Ratio of dividends to capital and surplus.										
	1870.	1871.	1872.	1873.	1874.	1875.	1876.	1877.	1878.	Av'ge	
	<i>P. ct.</i>	<i>P. ct.</i>	<i>P. ct.</i>	<i>P. ct.</i>	<i>P. ct.</i>	<i>P. ct.</i>	<i>P. ct.</i>	<i>P. ct.</i>	<i>P. ct.</i>	<i>P. ct.</i>	<i>P. ct.</i>
New England States.....	8.4	8.3	8.1	8.2	7.7	7.6	6.7	6.0	5.5	7.4	7.4
Middle States.....	8.1	7.9	7.9	7.9	7.6	7.7	7.7	6.6	6.1	7.5	7.5
Southern States.....	10.7	10.1	9.5	8.8	8.2	7.7	7.6	7.1	6.2	8.4	8.4
Western States.....	8.5	8.2	9.3	9.0	8.6	8.6	8.1	9.6	7.7	8.7	8.7
United States.....	8.4	8.3	8.3	8.3	7.9	7.8	7.5	7.1	6.2	7.7	7.7

The ratio to capital and surplus of the total net earnings of all the national banks was, in 1876, 6.9 per cent; in 1877, 5.6 per cent, and in 1878, 5.1 per cent.

The average ratio of dividends to capital in the New England and Middle States, where the greater portion of the capital of the national banks is held, was, during the last three years, 8.2 per cent. In the same States the ratio of dividends to the combined capital and surplus was 6.5 per cent, and the ratio of the net earnings to capital and surplus was 5.1 per cent.

The belief, so widely entertained, that the profits made by the national banks are excessive, is in great part due to the exceptionally large dividends paid by a few banks which are favorably located and have a large surplus, and which make large returns to their shareholders on the amount of their nominal capital. The profits of these banks are not to any considerable extent derived from their circulation, but from surplus and deposits. Many of the banks making these exceptional dividends have a much less amount of circulation than those making moderate dividends only, while a few of them have no circulation whatever.

If the bank act gives to the national banks the privilege of circulation, it also provides for a United States tax upon circulation, deposits and capital, and for a State tax upon the shares of each bank, to be determined by the legislature of each State, at a rate estimated to be not greater than is assessed upon other money capital in the hands of individual citizens of each State. The total amount of United States taxes collected from the commencement of the system to the present time is as follows:

On circulation.	On deposits.	On capital.	Total.
\$39,775,517 35	\$40,325,256 32	\$5,939,450.73	\$86,033,554.40

The annual amount of taxation, national and State, has for the last four years been as follows:

Years.	National.	State.	Total.
1874	\$7,256,083	\$9,620,376	\$16,876,459
1875	7,317,521	10,058,192	17,375,713
1876	7,076,087	9,701,732	16,777,819
1877	6,903,573	8,829,304	15,732,877
Totals	\$28,552,274	\$38,209,484	\$66,761,758

* * * The rate of taxation upon the banks in the city of New York and in other cities has averaged more than five per cent annually during the past four years, and there is no doubt that the annual taxes collected from these institutions has been greatly in excess of the rate collected upon the capital of other corporations, private firms and individuals, which cannot be as accurately determined as is that of the national banks from their published statements.

NATIONAL-BANK FAILURES.

The failures in this country of State banks and private bankers are known to have been numerous and frequent; but information as to their numbers, or to the consequent losses to their stockholders or creditors, has not been attainable by the Comptroller. The bank departments of the different States give no information on this subject except as to the losses upon bank currency, and even that information has been of a scanty character. As a rule, under the different State laws, the affairs of insolvent institutions have been liquidated by a receiver appointed by the court, and the receiver has not reported to any State officer, but to the court which appointed him. Full information with reference to these insolvent institutions is therefore in most cases unattainable. The losses upon currency are estimated to have been five per cent annually upon the amount issued, but no estimate has ever been made of the losses to creditors and shareholders. Under the national bank system, however, the losses as well as profits of each bank are reported to this office. If a bank becomes insolvent, the Comptroller, by law, appoints the receiver, and exercises full supervision over the closing up of its affairs. The files of this office, therefore, contain a complete record of everything pertaining to the settlement of the business of such associations. The following table exhibits the number of failures of national banks in each State, together with their capital, amount of claims proved, the amount of dividends paid, and the estimated losses to creditors, from the organization of the system to July 1 of the present year:

States.	No. of banks.	Capital.	Claims proved.	Dividends paid.	Estimated losses.	Per cent of div. paid.
Connecticut	1	\$60,000	\$97,541	\$82,910	\$10,000	85.00
New York	16	4,076,100	5,722,248	5,010,536	340,498	88.43
Pennsylvania	8	1,312,000	1,553,564	895,103	416,850	57.62
Dist. of Columbia	2	700,000	2,483,828	1,785,173	504,655	78.00
Virginia	4	800,000	1,610,045	646,118	931,789	38.52
Alabama	1	100,000	289,407	121,551	167,856	42.00
Mississippi	1	50,000	33,562	11,746	20,900	35.00
Louisiana	3	1,600,000	2,931,544	1,805,060	922,900	61.02
Texas	1	50,000	60,330		60,000	
Arkansas	1	50,000	15,142	15,142		100.00
Tennessee	1	100,000	316,332	65,333	311,597	17.33
Missouri	2	3,100,000	2,683,093	961,918	740,000	37.48
Ohio	3	250,000	422,291	190,557	189,800	45.06
Indiana	4	282,000	505,531	239,893	178,800	47.45
Illinois	8	2,250,000	3,366,767	1,414,368	1,096,108	41.01
Wisconsin	1	50,000	1,445	47,055	70,000	35.00
Iowa	3	200,000	290,477	131,138	90,998	62.35
Minnesota	2	200,000	313,429	210,016	61,500	67.00
Kansas	2	160,000	141,576	84,195	57,381	59.47
Nevada	1	250,000	178,013	153,011	17,001	96.00
Colorado	2	225,000	178,135	32,418	17,000	18.19
Utah	1	150,000	89,200	13,380	71,200	15.00
Totals	69	\$16,015,100	\$23,398,709	\$14,010,313	\$6,415,423	59.88

From the above table it will be seen that the total amount of capital of all the insolvent national banks is \$16,015,100; amount of claims proved, \$23,398,709; of dividends paid, \$14,010,313; while the estimated losses are but \$6,415,423. The average number of failures during each of the past fifteen years has been less than five, and the average annual loss less than \$430,000.

The City of Glasgow Bank, which recently failed in Scotland, had a capital and surplus of less than \$8,000,000, and liabilities of more than \$50,000,000. It loaned to four debtors of the bank more than \$23,000,000, upon which there is a loss of more than \$21,000,000. The deficiency in the assets is nearly \$26,000,000, which is four times as great as the losses to all the creditors of national banks which have failed since the organization of the system. The Bank Superintendent of the State of New York reports the liabilities of twenty-two savings banks which have failed in that State during the last six and one-half years at \$12,188,772, and estimates the losses to their creditors at \$4,303,616, which is more than one-third of their entire indebtedness. He estimates the losses during the last three years at \$3,400,000, which is more than one-half of the estimated losses to the creditors of all the national banks in the United States from the beginning of the system until now. The losses from five State banks in the city of Chicago during the last two years, which banks were organized under special charters, under which neither State supervision nor reports were required, is estimated to be \$3,819,500, on liabilities of \$5,785,572. The losses from the State and savings banks of the country during the last two years only are known to have been greater than the total loss resulting from all the failures which have occurred of national-banking associations. The government has had large amounts on deposit continually with a great number of national banks throughout the country, for its convenience in making disbursements, but has suffered no loss during the past twelve years. Upon the circulating notes of the national banks there has been no loss whatever.

PUBLIC STATEMENTS AND EXAMINATIONS.

One of the most important provisions of law relating to the

national banks is that requiring statements of their resources and liabilities to be made at such times and in such manner as the Comptroller may direct, and the publication of these statements in the daily newspapers of the country. The banks are also required to make returns to the Comptroller, semi-annually, of their earnings, losses and dividends; and all of these returns are compiled by him and annually transmitted to Congress. The Comptroller has authority to call upon the banks for any and all information concerning their affairs which may be thought of value; and it is his endeavor to communicate annually to Congress and the people the fullest possible knowledge attainable upon every question of interest connected with the business of banking. Letters, also, from whatever source, asking for proper information on these subjects, are always fully answered. The annual reports which have been issued from this office are themselves evidence of the great amount and value of the information to be derived from the returns made by the national banks.

The law also provides for a thorough examination of the banks by competent persons as frequently as the Comptroller may think desirable. This feature of the law was at first exceedingly unpopular, but it is now generally approved by the banks themselves, and has been attended by the best results. Irregularities are not so likely to be allowed when it is known that they may be exposed by a competent examiner. In numerous instances unlawful dividends have been prevented, impaired capital discovered and its restoration compelled, and large losses to both shareholder and creditors avoided, by the prompt action of this office, based upon the report of an examiner. The excellent system now in operation is in strong contrast with the generally lax systems of bank reports and supervision which prevailed previous to the passage of the national-bank act.

The Comptroller, in his report for 1876, made an effort to collect from official sources the general bank statistics of the country. Only two balanced statements of the first Bank of the United States could be found, and previous to 1833 the published bank statistics consisted mainly of estimates made, or statements unofficially compiled by individuals. Subsequently, statements were obtained by this department from the several State officials, and were compiled annually for the use of Congress. But the State laws differed widely in their requirements, both as to the nature of the returns to be made by the banks and the dates which they should bear. Instead of a uniform time and similarity in form being required by all the States, as is now required under the national system, there was great diversity in both date and form, so that when the compilation of the reports was completed by this department the work was very unsatisfactory, and it was found impracticable to give anything like a just or true presentment of the condition of the banks of the country on or near any given day.

FUNDING THE NATIONAL DEBT.

One of the chief objects in view in the organization of the national system was, not only to furnish bank notes which were safe and convertible, but to supply a steady market for and facilitate the negotiation of United States bonds; and there is no doubt that the credit of the government and its ability to borrow money at low rates of interest have been greatly increased by making its bonds a basis for the issue of national-bank notes.

Of the United States bonds held by the national banks on November 1, 1868, and deposited with the Treasurer as security for their circulating notes, nearly three-fourths bore interest at the rate of six per cent. The amount of this class of bonds has since been gradually reduced, until it is now less than one-fourth of all the bonds held, while nearly one-fourth of the whole amount bears interest at the rate of four and one-half and four per cent on y. About one-fifth of the entire issues of the latter classes of bonds is now held by the national banks. This will be seen from the following table, which exhibits the amount and classes of bonds held as security for circulation on the 1st day of November, for each year since 1865, and the rate of interest which they respectively bear:

Dates.	6 per cent. bonds.	5 per cent. bonds.	4½ per cent. bonds.	4 per cent. bonds.	Total.
Nov. 1, 1865..	\$202,523,350	\$74,619,950	\$.....	\$.....	\$281,143,300
Nov. 1, 1866..	244,993,200	90,070,400	335,063,600
Nov. 1, 1867..	251,274,800	91,376,450	342,651,250
Nov. 1, 1868..	252,623,750	88,888,750	341,512,500
Nov. 1, 1869..	249,724,650	92,731,300	342,455,950
Nov. 1, 1870..	247,466,950	91,484,600	344,745,550
Nov. 1, 1871..	181,158,600	185,355,800	367,114,400
Nov. 1, 1872..	123,303,100	211,866,800	334,969,900
Nov. 1, 1873..	157,834,950	235,017,150	392,852,100
Nov. 1, 1874..	145,981,650	239,440,100	385,421,750
Nov. 1, 1875..	128,503,212	239,046,300	367,549,512
Nov. 1, 1876..	103,819,300	223,602,700	10,305,800	337,727,800
Nov. 1, 1877..	81,934,550	200,090,500	45,089,700	15,884,150	343,048,900
Nov. 1, 1878..	72,829,750	196,615,600	49,397,250	30,566,300	349,408,900

The government has still outstanding more than 693 millions of six per cent and more than 703 millions of five per cent bonds. The reduction of the interest on this amount to four per cent would save to the government nearly 21 millions of interest annually. The funding of the six per cent bonds into four per cents has made rapid progress during the last year, and the banks have been of great service to the government in this process of refunding, by negotiating and absorbing a very considerable part of the new issues. Should the national system continue, there is no doubt that the present rapid reduction in the burden of interest will continue also. If the national-bank system is to be abolished, and an additional amount of United States notes is to be issued, all hope of reducing the rate of interest on the public debt must be abandoned.

VALUE OF CIRCULATION TO THE NATIONAL BANKS.

The profit to the national banks derived from the issue of circulating notes is not great, as is frequently asserted, being but

about 2½ per cent more per annum on the capital invested in the bonds pledged to secure the circulation than could be obtained by lending directly the same amount of capital. The table below shows the amount of bonds deposited in the Treasury on Nov. 1, 1878, to secure national-bank circulation, their various classes, their currency value, the circulation issuable thereon, and the annual interest upon them:

Classes of bonds.	Par value.	Currency value.	Circulation issuable.	Annual gold interest.	Currency value of interest.
6s of 1861.....	\$56,483,450	\$61,072,730	50,835,103	\$3,389,007	\$3,397,480
5-20s of 1865, 2d series.....	825,700	851,503	743,130	49,542	49,666
5-20s of 1865, 3d series, 67s.....	8,172,100	8,672,641	7,354,890	490,326	491,552
5-20s of 1865, 4th series, 68s.....	1,764,500	1,905,600	1,588,050	105,870	106,135
10-40s of 1864.....	70,687,480	75,195,284	63,619,965	3,544,443	3,544,279
5s of 1881, funded 1881s.....	123,926,750	132,233,058	113,334,075	6,236,337	6,218,078
4½s of 1891, funded 1891s.....	49,397,250	51,311,393	44,457,525	2,322,816	2,322,433
4s of 1907, consols of 1907.....	30,566,300	30,566,300	27,509,670	1,232,652	1,225,709
Pacific Railroad bonds.....	5,584,000	6,735,100	5,025,600	335,040
Total.....	349,408,900	368,534,279	314,468,010	17,311,053	17,689,372

It will be seen that the currency value of the bonds, which represents the amount of capital invested in their purchase, is \$368,534,279. If this amount of capital were placed at interest at eight per cent per annum, estimated as the average rate of interest obtainable throughout the country, it would produce \$29,482,742. The annual interest on the bonds of the banks amounts, as shown by the table, to \$17,311,053 in gold and \$335,040 in currency, the total currency value of the interest on November 1, 1878, (gold being quoted at the New York Stock Exchange on that date at one-quarter of one per cent premium), being \$17,689,372, which is the whole amount received annually by the banks; but as they are required to pay into the Treasury of the United States a tax of one per cent per annum upon their circulation, which, upon the amount issuable, is \$3,144,680, the net amount of interest received by them is thereby reduced to \$14,544,692. This amount, together with the interest which the banks receive on the amount of their circulation available for use, gives the whole income derived by them from their circulation and the bonds deposited to secure it.

The amount available for use is that issuable (being 90 per cent of the par value of the bonds pledged), less an amount equal to five per cent thereof, which the banks are required, by the act of June 2, 1874, to place with the Treasurer of the United States, as a redemption fund. Therefore, even if the banks could keep loaned out all the time the whole of their circulation available for use, which is in practice an impossibility, they could have free for loaning but \$298,744,610 of the \$314,468,010 issuable upon their bonds; and that amount loaned at the rate named, eight per cent per annum, would produce \$23,899,569, which, together with the net interest received on the bonds, makes \$38,444,261 as the income derived by the banks from their bonds and circulation, as against \$29,482,742 that would be produced by lending the capital invested in the bonds directly at the same rate of interest. The difference between the two sums, which is \$8,961,519, or 2½ per cent on the capital invested, represents the true amount of profit that the banks can, under the most favorable circumstances, receive from their circulation.

To recapitulate:

The interest at 8 per cent per annum on the loanable amount of circulation, which, as shown above, is \$298,744,610, is \$23,899,569
The currency value of the interest on the bonds deposited to secure the circulation is .. 17,689,372

Gross amount received by the banks from bonds and loanable circulation .. \$41,588,941
From which deduct one per cent of the issuable amount of circulation as the tax thereon .. 3,144,680

Net income upon the capital employed .. \$38,444,261
The capital necessary to purchase the bonds pledged by the banks, which, as shown above, is \$368,534,279, loaned at 8 per cent per annum would produce .. 29,482,742

Difference, representing the profit on circulation if the whole amount available for use be loaned continually throughout the year .. \$8,961,519

Two and forty-three hundredths per cent on the capital employed (\$368,534,279) is \$8,955,383, which, as shown above, is about the value of circulation to the national banks if they could keep the whole amount of their issues loaned out all the time.

In the above calculation no deduction is made for the costs of the redemption of the bank circulation, which lessens by so much the profits on circulation. The cost of redemption for the fiscal year ending June 30, 1878, was \$317,942 48; for the year ending June 30, 1877, it was \$357,066 10; for the year ending June 30, 1876, \$363,193 31; and for the year ending June 30, 1875, \$290,965 37.

In localities where the annual rate of interest is seven per cent, the value of circulation is about two and sixty-two hundredths per cent per annum, and where the rate is ten per cent, its value is about two and five hundredths per cent.

The large margin (\$54,066,269) between the value of the bonds owned by the banks and the circulation issuable thereon would, in case of disaster, be available as a reserve for the payment of the depositors or other creditors, and this is an additional argument in favor of issuing circulation under the restrictions of the law as now provided.

Another thing that should be considered in estimating the value of circulation is, that the banks held their bonds at a premium, which, though it has been greatly reduced in the past, still appears among their assets for a large amount, and which will disappear when the bonds shall mature and be paid by the United States. The amount of premium appearing as an asset of the banks on October 1, 1878, the date of the last report of their condition, is \$7,134,736.

If all of the bonds of the banks necessary to secure their circulation were converted into four per cent bonds, the value of circulation, taking the same amounts of bonds and circulation as are used above, would be shown as follows:

Interest on \$298,744,610 of circulation, loaned at 8 per cent per annum \$23,899,569
Currency value of interest on bonds 14,011,297

Total \$37,910,866
Less tax on circulation 3,144,630

Total profit on capital employed \$34,766,186
The same capital loaned directly at 8 per cent per annum would earn 29,482,742

Difference, representing profit on circulation when the whole issue is kept loaned out \$5,283,444
Which is 1 43-100 per cent on the capital employed.

If the rate of interest were seven per cent, the annual profit on circulation issued upon four per cent bonds, would be 1 62-100 per cent; and if the rate were ten per cent, the profit would be 1 5-100 per cent.

The average rate of State taxation upon the capital of the national banks is about two per cent per annum; and if they should go into liquidation, and the owners of the bonds should continue to hold them, the amount of State taxation saved to them would nearly or quite equal the benefit they now derive from circulation.

RESUMPTION AND RESERVE.

The law provides that banks in New York City shall hold a cash reserve of 25 per cent upon their deposits, and that banks in the other principal cities shall hold an equal ratio of reserve, one-half of which must be in bank, while the remainder may be on deposit in New York. All other banks must hold a reserve of 15 per cent upon deposits, two-fifths of which must be on hand in lawful money, and the remainder may be on deposit with banks in the reserve cities. The amount of reserve held on the first day of October last was greater than that required by law, as may be seen by reference to the following table:

Cities.	No. of banks.	Circulation.	Reserve.	Legal tender funds.	Due from res. agts.	Total reserve funds.	Ratio of legal tender funds to—	Reserve to circulation and deposits.
							Circulation.	Deposits.

Totals.....	221	82,673,399.03	92.98	29.06	121.99	113.4	23.9	25.9
Other banks..	1,822	219,222,288.30	50.02	56.08	106.04	22.8	17.4	20.9
Aggregates..	2,043	301,891,677.33	142.95	85.08	228.03	47.3	21.1	23.3

The amount of legal tender funds held by the banks in New York city on October 1 was \$50,921,576, which was 26.8 per cent upon their deposits and 24.3 per cent upon circulation and deposits. The amount held by the banks in the principal cities, including New York, was \$92,934,123, or 112.4 per cent upon their circulation, and 23.9 per cent upon their deposits; and the total cash reserve of all the national banks was \$142,955,718, or 47.3 per cent of the total out-standing circulation of the banks then in operation, and 21.1 per cent of their deposits. This reserve consisted of \$30,688,606 of specie, \$97,061,571 of legal tender notes, and \$15,205,541 deposited in the Treasury for the redemption of circulating notes. It is evident that the banks are well prepared to redeem their circulating notes in legal tender notes, in accordance with law. The national and State banks in New York city and in Boston have already signified their intention to co-operate with the Treasury Department in the resumption of specie payments, which takes place on the 1st day of January next, as provided by law, as may be seen from the late action of the Clearing House Associations of those cities.

NATIONAL-BANK AND LEGAL TENDER NOTES, BY DENOMINATIONS.

The subjoined table exhibits, by denominations, the amount of national bank and legal tender notes outstanding on November 1, 1878:

Denominations.	Amount of national bank notes.	Amount of legal tenders.	Total.
Ones.....	\$4,384,319	\$30,378,531	\$34,762,850
Twos.....	2,532,146	20,332,920	22,865,066
Fives.....	92,534,275	55,578,740	148,113,015
Tens.....	102,981,440	65,928,631	168,910,071
Twenties.....	6,219,780	63,505,949	69,725,729
Fifties.....	20,967,800	24,691,195	45,658,995
One Hundred.....	27,104,400	31,377,070	58,481,470
Five Hundreds.....	657,500	30,501,500	31,159,000
Thousands.....	304,000	33,490,500	33,794,500
Add for fractions of notes not presented or destroyed.....	11,561		11,561
Totals.....	\$31,652,121	\$347,681,016	\$379,333,137
Deduct for legal tenders destroyed in Chicago fire.....		1,000,000	1,000,000
Balances.....	\$31,652,121	\$346,681,016	\$378,333,137

Section 5175 of the Revised Statutes provides "that not more than one-sixth part of the notes furnished to any association shall be of a less denomination than five dollars, and that after specie payments are resumed no association shall be furnished with notes of a less denomination than five dollars." In view of this provision, the printing of one and two dollar notes was discontinued on November 1, and it is not expected that any notes of these denominations will be issued after the close of the present year. Section 5182 of the Revised Statutes requires that the circulating notes of national banks shall be "signed by the president or vice-president and cashier thereof." The written signature of at least one bank officer is necessary, as a check between this office and the issuing bank; for, if the question of an over-issue of notes should arise, the signature of such officer would be a means of determining the genuineness of the note. A number of banks, however, issue their notes with printed signatures, and in some cases with lithographic ones, which are frequently so badly executed as to excite suspicion as to the genuineness of the notes. The Comptroller, in his last report, recommended an amendment of section 5182 of the Revised Statutes, imposing a penalty of twenty dollars for every note issued by a national bank without the written signature of at least one of the officers of the bank, which recommendation is now renewed.

NATIONAL-BANK CIRCULATION.

The following table exhibits by States and geographical divisions the number of banks organized and in operation, with their capital, bonds on deposit, and circulation issued, redeemed, and outstanding on the 1st day of November, 1878:

States and Territories.	Organized.	In liquidation.	In operation.	Capital paid in.	Bonds on deposit.	Circulation.
						Issued.

The act of February 28, 1863, and the subsequent act of June 3, 1864, authorized the issue of 300 millions of dollars of national bank circulation, which was increased by the act of July 12, 1870, to 354 millions. The act of June 20, 1874, authorized any national bank desiring to withdraw its circulating notes, in whole or in part, to deposit lawful money with the Treasurer of the United States, in sums of not less than \$9,000, and to withdraw a proportionate amount of the bonds held as security for such notes; and the act of January 14, 1875, repealed all provisions restricting

the aggregate amount of national-bank circulation, and required the Secretary of the Treasury to retire legal tender notes to an amount equal to 80 per cent of the national-bank notes thereafter issued, until the amount of such legal tender notes outstanding should be \$300,000,000, and no more. That portion of the above act which required a reduction of United States legal tender notes was repealed by the act of May 31, 1878.

The following table exhibits by States the issue and retirement of circulation during the year ending November 1, 1878, and the total amount issued and retired since June 20, 1874:

States and Territories.	Circulation issued.	Circulation retired.

LOST OR UNREDEEMED BANK NOTES.

The belief is very generally entertained that a considerable proportion of the circulating notes of each national bank will ultimately be lost or destroyed, and will therefore never be presented for redemption. It is also frequently stated that the loss of such notes inures to the benefit of the banks. Neither supposition is correct. Section 5222 of the Revised Statutes requires that all national banks which go into voluntary liquidation shall, within six months thereafter, deposit in the Treasury an amount of lawful money equal to the amount of their circulating notes outstanding. The law also requires that full provision shall be made for the redemption of the circulating notes of any insolvent bank, before a dividend is made to its creditors. Thus it will be seen that no association can close up its business without first providing for the payment of all its circulating notes, and that the amount deposited for their redemption must remain in the Treasury until the last outstanding note shall have been presented. It is therefore a pain that the government, and not the bank, receives all the benefit arising from lost or unredeemed circulating notes.

In a previous report, returns as to unredeemed circulation were given for 286 State banks organized under the authority of the legislature of the State of New York. The maximum amount of circulation issued to them was \$50,754,514, and the amount of unredeemed circulation at the date of the report named was \$1,336,337, or 2.63 per cent of the highest amount issued. The maximum amount of circulation issued to 30 State banks in the city of New York, which are still in operation either as national or State associations, was \$7,763,010, while the amount remaining unredeemed in October, 1875, was \$142,366, or only 1.83 per cent of the highest amount issued. The amount of circulation issued to 240 State banks in Wisconsin was \$7,565,409, and the amount unredeemed is \$134,747, the percentage of unredeemed notes being 1.78 only. The maximum issue to 210 State banks in the six New England States was \$39,245,380, while the amount remaining unredeemed is but \$792,767, the proportion of the latter to the former being 2.02 per cent. The returns from 332 State banks in New York, New Jersey, Delaware and Maryland show their maximum circulation to have been \$65,664,176, while the amount unredeemed is \$1,707,428, and the percentage 2.60. The percentage of unredeemed notes of 25 State banks in Ohio, having a circulation of \$2,196,381, was 2.79. The greatest amount of circulation issued to 707 State banks, in 12 States, was \$114,671,346, the amount outstanding \$2,696,282, and the proportion unredeemed 2.4 per cent.

It is probable that, under the national system of redemption, the proportion of national-bank notes redeemed will be much greater than that of the State-bank notes under the old system. The highest amount of circulation issued to 15 national banks which failed previous to 1870 was \$1,554,400, and the amount outstanding on November 1, 1878, was \$13,440 50, the proportion of notes remaining unredeemed being only 0.86 per cent of the amount issued. The total amount issued to 23 national banks which failed previous to the year 1873 was \$3,196,693; and the amount outstanding on November 1, 1878, was \$57,074, the proportion of notes remaining unredeemed being but 1.78 per cent of the amount issued.

Of the circulation of 51 national banks in voluntary liquidation previous to 1873, amounting to \$5,832,940, there yet remains outstanding \$151,486, or 2.59 per cent only, of the amount issued; and of the circulation of 75 banks in liquidation prior to 1872, amounting to \$8,648,980, there remains outstanding \$237,448, which is equal to a percentage of 2.63; and of the circulation of 89 banks in liquidation prior to 1873, in amount \$10,764,080, there remains outstanding \$303,274, or 2.82 per cent of the amount issued.

The amount of demand Treasury notes issued from July 17, 1861, to December 31, 1862, was \$60,000,000, in denominations of five, ten and twenty dollars; and the amount remaining outstanding on the 1st of November last was \$62,065, the proportion unredeemed being a little more than one-tenth of one per cent, \$3,627 having been redeemed within the last two years.

SPECIE IN BANK AND ESTIMATED SPECIE IN THE COUNTRY.

The table below exhibits the amount of specie held by the national banks at the dates of their reports for the last six years; the coin, coin-certificates and checks payable in coin held by the New York city banks being stated separately:

Dates.	Held by Nat. Banks in N. Y. city.			Held by other Nat'l Banks.	Aggregate.
	Coin.	U. S. coin certificates.	Total.		
Feb. 28, 1873.....	\$1,958,769 86	\$11,539,780	\$13,498,549 86	\$4,279,123 61	\$17,777,673 53
April 25, 1873.....	\$1,344,9 0 93	\$11,743,320	\$13,088,250 93	\$3,780,557 81	\$16,868,808 74
June 13, 1873.....	\$1,442,097 71	\$12,139,080	\$13,581,177 71	\$4,368,909 01	\$17,950,086 72
Sept. 12, 1873.....	\$1,032,210 55	\$3,522,600	\$4,554,810 55	\$5,282,658 90	\$10,837,469 45
Dec. 26, 1873.....	\$1,376,170 50	\$18,325,764	\$19,701,935 50	\$7,055,107 08	\$26,757,042 58

Dec. 28, 1877.....	\$1,935,746 20	\$11,119,080	\$13,054,826 20	\$11,839,324 50	\$24,894,150 70
March 15, 1878.....	\$2,428,797 44	\$35,003,320	\$37,432,117 44	\$17,290,040 58	\$54,722,057 92
May 1, 1878.....	\$2,688,092 06	\$25,397,640	\$28,085,732 06	\$17,538,024 00	\$45,623,756 06
June 29, 1878.....	\$1,905,705 22	\$11,554,500	\$13,460,205 22	\$15,391,264 55	\$28,851,469 77
Oct. 1, 1878.....	\$1,779,792 48	\$11,514,810	\$13,294,602 48	\$17,394,004 16	\$30,688,606 59

The amount of silver coin held by the national banks on June 30 and October 2, 1876, was \$1,627,566 and \$2,557,599 respectively. The amount held on October 1, 1877, was \$3,700,703, and on October 1, 1878, \$5,387,738. The aggregate amount of specie held by the State banks in New England, in New York, New Jersey, Pennsylvania, Maryland, Louisiana, Ohio and Wisconsin, as shown by their official reports for 1878, was \$3,023,429, of which the banks in New York city held \$2,629,839. In the returns from California the amount of coin is not given separately.

In my last annual report a statement was given from estimates made by the Director of the Mint, showing that the probable amount of coin and bullion in the country on June 30, 1877, was \$242,855 858, of which \$50,135,628 was silver. Assuming this estimate to have been substantially correct, the movement of coin and bullion for the year ending June 30, 1878, and the amount in the country at the latter date, is shown, from further estimates of the Director of the Mint, to have been as follows:

Estimated amount of coin and bullion in the country June 30, 1877.....	\$242,855 858
Estimated product of the mines for the year.....	99,000,000
Imports of gold for the year.....	13,330,715
Imports of silver for the year.....	16,490,599
Total.....	\$371,677,172
Deduct exports of gold.....	\$9,197,555
Deduct exports of silver.....	24,535,670
Deduct amount used in the arts and manufactures.....	5,500,000—
Total estimated amount of coin and bullion in the country on June 30, 1878.....	\$332,443,947

Of this amount, \$244,353,390 was in gold coin and bullion, and \$88,090,557 in silver coin and bullion. The increase for the fiscal year was \$89,588 089, of which \$51,633,160 was in gold coin and bullion and \$37,954,929 in silver coin and bullion. The Director estimates the amount of gold coin and bullion in the country on September 30, 1878, at about \$259,353,390, and of silver coin and bullion at about \$99,090,557, making a total of \$358,443,947.

LOANS AND RATES OF INTEREST OF NEW YORK CITY NATIONAL BANKS.

The following table contains a classification of the loans of the national banks in New York city for the last five years:

Loans and Discounts.	October 2, 1874.	October 1, 1875.	October 2, 1876.	October 1, 1877.	October 1, 1878.
	48 Banks.	48 Banks.	47 Banks.	47 Banks.	47 Banks.
On endorsed paper.....	\$ 116,719,349	\$ 120,189,537	\$ 95,510,311	\$ 92,618,776	\$ 83,924,333
On single-name paper.....	19,959,606	18,575,100	16,634,532	15,800,500	17,297,475
On U. S. bonds on dem'd.	4,721,638	4,934,674	6,277,492	4,763,448	7,003,085
On other stocks, &c., on demand.....	51,453,682	50,179,254	58,749,574	48,376,633	51,120,021
On real estate security.....	273,081	88,100	39,802	4,753	78,514
Payable in gold.....	5,753,188	3,454,370	4,681,570	4,319,014	6,752,181
All other loans.....	2,909,557	3,908,602	1,532,944	2,786,456	2,670,371
Totals.....	\$ 301,777,034	\$ 302,039,733	\$ 184,243,225	\$ 169,162,391	\$ 169,585,960

The average rate of interest in New York city for each of the fiscal years from 1874 to 1878, as ascertained from data derived from the *Journal of Commerce* and the *FINANCIAL CHRONICLE* of that city, was as follows:

1874, call loans, 3-8 per cent; commercial paper, 6-4 per cent.
 1875, call loans, 3-0 per cent; commercial paper, 5-6 per cent.
 1876, call loans, 3-8 per cent; commercial paper, 5-3 per cent.
 1877, call loans, 3-0 per cent; commercial paper, 5-2 per cent.
 1878, call loans, 4-4 per cent; commercial paper, 5-1 per cent.

The average rate of interest of the Bank of England for the same years was as follows:

During the calendar year ending Dec. 31, 1874, 3-69 per cent.
 During the calendar year ending Dec. 31, 1875, 3-23 per cent.
 During the calendar year ending Dec. 31, 1876, 2-61 per cent.
 During the calendar year ending Dec. 31, 1877, 2-91 per cent.
 During the fiscal year ending June 30, 1878, 3-07 per cent.

The rate of interest in the city of New York on November 22 of the present year, as quoted in the *Daily Bulletin*, was, on call loans, from 3 to 4 per cent, and on commercial paper of the best grade, from 4 1/2 to 5 per cent. The rate of interest of the Bank of England, which on November 29 of last year was 4 per cent, had fallen on January 30 following to 2 per cent, from which date to October 14 there were seven changes, and, with a single exception on May 29, a gradual increase. The rate was fixed on the date last named at 6 per cent and reduced on November 21 to 5 per cent.

SECURITY OF CIRCULATING NOTES.

The following table exhibits the kinds and amounts of United States bonds held by the Treasurer on the 1st day of November, 1878, to secure the redemption of the circulating notes of national banks:

Classes of bonds.	Authorizing act.	Rate of interest.	Amount.
Loan of February, 1861, (81s).....	February 8, 1861.	6 p. ct.	\$2,276,000
Loan of July and Aug., 1861 (81s).....	July 17 and Aug. 5, 1861	do	34,416,550
Loans of 1863 (81s).....	March 3, 1863.	do	19,790,900
Consols of 1863.....	March 3, 1865.	do	825,700
Consols of 1877.....	do	do	8,172,100
Consols of 1898.....	do	do	1,764,500
Ten-forties of 1894.....	March 3, 1894.	5 p. ct.	70,688,850
Funded loan of 1881.....	July 14, '80, & Jan. 30, '71	do	125,926,750
Funded loan of 1891.....	do	4 1/2 p. ct.	49,397,250
Funded loan of 1907.....	do	4 p. ct.	10,566,300
Pacific Railway bonds.....	July 1, 1862, & July 2, '64	6 p. ct.	5,584,000
Total.....			\$349,408,900

All of these bonds, with the exception of \$53,088 80 of 6 per cents, are, by the terms of the acts under which they were issued, payable in coin. Of the latter amount, \$36,692 550 consist of sixes of 1881, which were issued prior to the passage of the legal tender act; \$10,762,300 of five-twenties, which were issued under the act of March 3, 1865, which law does not specify the kind of money in which the bonds issued under it shall be paid; and \$5,584,000 of Pacific Railroad currency sixes.

On October 1, 1870, the banks held \$246,891,300 of 6 per cent bonds, and \$95,942,550 of 5 per cents. Since that time there has been a decrease of \$174,081,550 in 6 per cent bonds, and an increase of \$100,673,050 in the 5 per cents.

During the three years ending November 1, 1878, there has been a decrease of \$53,073,463 in 6 per cent and of \$42,430,000 in 5 per cent bonds, while in the same period \$49,397,250 of 4 1/2 per cents and within the last eighteen months \$30,566,300 of 4 per cents have been deposited.

TAXATION, EARNINGS AND DIVIDENDS.

The Comptroller has in former reports discussed at considerable length the question of bank taxation, and he respectfully repeats at the present time his previous recommendations for the repeal of the law imposing a tax upon capital and deposits.

Special attention is called in this connection to the elaborate tables herewith presented, showing, for a series of years, the amount of national and State taxation paid by the national banks, the amount of losses charged off by them, the number of banks which have been compelled to pass dividends, and the low ratio of their earnings and dividends to capital and surplus. It will be seen that the average rate of taxation upon capital for the past four years has been nearly three and one-half per cent, while in the city of New York it has exceeded five per cent; that during the last three years the banks have suffered losses amounting to more than sixty-four million dollars; and that the ratio of their earnings to capital and surplus was in 1877 but 5-62, and in 1878 but 5-14 per cent. No more conclusive proof of the justice of the request for the repeal of the law imposing these taxes can be given than is contained in these various tables.

The national banks pay annually to the government, in semi-annual installments, a duty or tax of one per cent upon the average amount of their circulating notes outstanding, one-half of one per cent upon the average amount of their deposits, and a like rate upon the average amount of their capital stock not invested in United States bonds. The following table exhibits the amount of such duties paid by the national banks yearly, from the commencement of the system to July 1 of the present year:

Years.	On Circulation.	On Deposits.	On Capital.	Totals.
1861.....	\$33,096 97	\$95,811 25	\$18,402 23	\$147,310 45
1862.....	733,247 59	1,087,530 68	133,251 15	1,953,029 60
1863.....	2,106,755 80	2,635,102 77	406,347 74	5,148,206 31
1864.....	2,388,628 78	2,630,180 07	321,881 56	5,340,690 41
1865.....	2,946,843 44	2,664,143 44	306,781 67	5,917,768 55
1866.....	2,974,716 73	2,614,553 58	312,908 63	5,894,888 99
1867.....	2,949,744 13	2,614,767 61	375,962 26	5,940,474 00
1868.....	2,987,021 69	2,802,840 85	385,292 13	6,175,154 67
1869.....	3,193,570 03	3,120,981 37	389,356 27	6,703,910 67
1870.....	3,353,181 13	3,196,69 29	454,891 51	7,004,646 93
1871.....	3,404,483 11	3,309,967 72	469,048 02	7,083,498 85
1872.....	3,283,405 69	3,514,310 39	507,417 76	7,305,134 04
1873.....	3,09,795 76	3,405,124 64	632,396 16	7,229,329 56
1874.....	2,899,037 09	3,443,252 74	654,136 96	6,996,426 79
1875.....	2,948,047 08	3,273,111 74	560,296 83	6,781,455 65
Aggregates.....	\$39,775,817 35	\$40,328,256 32	\$5,939,480 73	\$86,083,554 40

The amounts paid to the Commissioner of Internal Revenue during the same years, by banks and bankers, other than national, is shown in the following table:

Years.	On Circulation.	On Deposits.	On Capital.	Totals.
1864.....	\$2,056,996 30	\$780,723 52	\$.....	\$2,837,719 82
1865.....	1,993,661 84	2,043,84 08	903,357 98	4,940,570 90
1866.....	990,273 11	2,099,435 83	374,074 11	3,463,983 05
1867.....	214,298 75	1,355,395 98	476,877 73	2,046,572 46
1868.....	23,669 88	1,438,512 77	399,562 90	1,862,745 55
1869.....	16,665 05	1,734,417 63	445,071 49	2,196,054 17
1870.....	15,419 94	2,177,576 46	527,087 21	2,700,083 61
1871.....	22,781 82	2,702,196 84	919,292 77	3,644,271 43
1872.....	8,913 82	3,405,251 71	976,037 61	4,429,292 14
1873.....	24,778 62	3,009,302 79	736,950 05	3,771,031 46
1874.....	16,738 26	2,453,544 26	916,778 15	3,587,060 67
1875.....	22,746 27	2,972,360 27	1,102,241 58	4,097,348 12
1876.....	17,947 67	2,999,530 75	989,219 61	4,006,698 03
1877.....	5,430 16	2,896,637 93	927,661 24	3,829,729 33
1878.....	1,118 72	2,593,687 29	897,235 84	3,492,081 85
Aggregates.....	\$5,436,351 31	\$34,900,515 11	\$10,891,528 27	\$51,228,394 69

It will be seen by the above tables that, since 1864, the total taxes collected by the government from the banks and bankers of the country amounts to \$137,261,949 09, of which the national banks have paid nearly two-thirds. One object in imposing these taxes upon the national banks was to make the system self-sustaining, so far as cost to the government is concerned; but while the whole expenses of this office, from its establishment to July 1 of this year, have been but \$4,525,022 66, the first of the foregoing tables show, that the national banks have returned to the government in taxes during this period the large sum of \$86,033,554, of which \$39,775,817 was paid on circulation alone. It is to be further observed that the whole of this amount has been collected without any expense to the government.

From returns made to this office by the national banks in several different years, in response to requests therefor by the Comptroller, the amount of State taxes paid by them for the years 1866, 1867, 1869, 1874, 1875, 1876 and 1877 has been definitely ascertained. No returns were obtained for the missing years in this series; but from the data furnished for the known ones, and the whole amount of taxes, State and national, paid by the national banks from the year 1866 to the present time is shown, yearly, in the table below:

Years.	Capital stock.	Amount of taxes.			Ratio tax to capital.		
		U. States.	Sta'e.	Total.	U. S.	State.	Total.
1866.	\$410,593,435	\$7,949,451	\$8,069,938	\$16,019,389	1-9	2-0	3-9
1867.	422,804,666	9,525,607	8,813,127	18,338,734	2-2	2-1	4-3
1868.	420,143,491	9,465,651	7,757,656	18,223,308	2-2	2-1	4-3
1869.	419,618,880	10,081,244	7,297,096	17,378,340	2-4	1-7	4-1
1870.	429,314,041	10,190,682	7,465,673	17,656,357	2-4	1-7	4-1
1871.	451,994,133	10,649,810	7,869,078	18,518,883	2-4	1-7	4-1
1872.	472,958,958	6,708,910	8,243,773	15,002,683	1-4	1-8	3-2
1873.	488,776,418	7,004,646	8,499,748	15,504,394	1-4	1-8	3-2
1874.	493,751,679	7,256,093	9,630,336	16,886,429	1-5	2-0	3-5
1875.	503,687,911	7,317,531	10,038,123	17,355,653	1-4	2-0	3-5
1876.	517,788,079	7,076,087	9,701,732	16,777,819	1-4	1-9	3-4
1877.	486,250,694	6,902,573	8,829,304	15,731,877	1-4	1-9	3-4

In the returns of United States taxes prior to the year 1873, in the above table, are included the special or license tax on two dollars on each one thousand dollars of capital, and an income tax on net earnings.

The States in which the ratios of taxation to capital were most excessive during the years 1875, 1876 and 1877 are shown in the table below:

States.	1875.	1876.	1877.
	U. S. State. Total.	U. S. State. Total.	U. S. State. Total.
New York.....	Per ct. 1-8 Per ct. 2-9 Per ct. 4-7	Per ct. 1-8 Per ct. 3-1 Per ct. 4-9	Per ct. 1-9 Per ct. 2-7 Per ct. 4-6
New Jersey.....	1-5 2-1 3-6	1-4 2-1 3-5	1-4 1-9 3-3
Ohio.....	1-4 2-4 3-8	1-3 2-7 4-0	1-0 2-4 3-4
Indiana.....	1-2 2-6 3-8	1-2 2-5 3-7	1-2 2-3 3-5
Illinois.....	1-8 2-4 4-2	1-8 2-4 4-2	1-6 2-6 3-8
Wisconsin.....	1-7 3-1 4-8	1-7 3-1 4-8	1-7 2-1 3-8
Kansas.....	1-4 3-2 4-6	1-5 3-0 4-5	1-7 2-6 4-3
Nebraska.....	2-2 3-4 4-6	2-5 3-7 4-9	2-3 3-5 4-7
So. Carolina.....	1-1 3-4 4-5	1-0 2-7 3-7	1-0 2-6 3-6
Tennessee.....	1-4 2-3 3-7	1-4 2-1 3-5	1-6 2-2 3-8

The evil effect of these high rates of taxation may be seen in the reduction of capital and surplus by the banks in the city of New York alone, during the last five years, which has been upon capital \$16,435,000, and upon surplus \$6,002,981; making a total of \$22,437,981. The State banks of the same city are reported to have also reduced their capital \$4,794,000, and surplus \$1,240,300; making a total reduction for all of the New York city banks, during that period, of \$28,572,281.

The inequality in the rate of taxation imposed by State authority upon banking capital in different localities is well illustrated by the following table, which gives the rate of such taxation in the principal cities of the country for the years 1875, 1876 and 1877, the ratio of United States taxation upon deposits, capital and circulation combined being also given for purposes of comparison:

Cities.	Rates of taxation.								
	1875.			1876.			1877.		
	U. S.	State.	Total.	U. S.	State.	Total.	U. S.	State.	Total.

* The capital of the banks that paid State, county and municipal taxes on stock and real estate is \$74,867,771.

† California banks pay no State taxes on capital, except such as is invested in real estate.

REDEMPTION.

The following table exhibits the amount of national bank notes received for redemption monthly by the Comptroller of the Currency for the year ending November 1, 1878, and the amount received for the same period at the redemption agency of the Treasury, together with the total amount received since the passage of the act of June 20, 1874:

Months.	Received by Comptroller.						Received at the redemption agency.
	From nat'l banks for release or surrender.	From redemption agency for release.	Notes of nat'l banks in liquidation.	Under act of June 20, 1874.	Total.

During the year ending November 1, 1878, there was received at the redemption agency of the Treasury \$202,499,740 of national bank notes, of which amount \$65,847,000, or about 32½ per cent, was received from the banks in New York city, and \$75,896,000, or about 37½ per cent, from Boston. The amount received from Philadelphia was \$10,756,000; from Baltimore, \$1,215,000; Pittsburg, \$1,026,000; Cincinnati, \$2,223,000; Chicago, \$2,866,000; St. Louis, \$814,000; Providence, \$4,945,000. The amount of circulating notes, fit for circulation, returned by the agency to the banks during the year was \$151,683,200. The total amount received by the Comptroller for destruction, from the redemption agency and from the national banks direct, was \$37,061,509. Of this amount \$5,880,516 were issues of the banks in the city of New York; \$4,447,325 of Boston; \$1,811,160 of Philadelphia; \$1,107,323 of Baltimore; \$1,087,470 of Pittsburg; \$435,200 of Cincinnati; \$444,898 of Chicago; \$169,673 of St. Louis; \$360,281 of New Orleans; \$351,800 of Albany; and \$359,490 of Cleveland.

There were, on November 1, \$282,991,768 of national bank notes outstanding upon which the charter number had been printed, and \$36,660,353 not having that imprint.

The following table exhibits the number and amount of national bank notes of each denomination which have been issued and redeemed since the organization of the system, and the number and amount outstanding on November 1, 1878:

Denominations.	Number.			Amount.		
	Issued.	Red'med	Outst'd'g	Issued.	Redeemed.	Outstand'g
1s.....	22,478,415	18,194,166	4,284,249	\$22,478,415	\$18,194,166	\$4,284,249

* Subtract or add for portions of notes lost or destroyed.

The following table shows the amount of national bank notes received at this office and destroyed, yearly, since the establishment of the system:

Prior to November 1, 1855.....	\$175,490
During the year ending October 31, 1866.....	1,050,382
During the year ending October 31, 1867.....	4,001,423
During the year ending October 31, 1868.....	4,602,825
During the year ending October 31, 1869.....	8,607,729
During the year ending October 31, 1870.....	14,305,689
During the year ending October 31, 1871.....	24,344,047
During the year ending October 31, 1872.....	30,211,720
During the year ending October 31, 1873.....	36,433,171
During the year ending October 31, 1874.....	49,939,741
During the year ending October 31, 1875.....	137,697,496
During the year ending October 31, 1876.....	9,672,716
During the year ending October 31, 1877.....	76,918,948
During the year ending October 31, 1878.....	57,391,249
Additional amount destroyed of notes of banks in liquidation.....	23,524,492
Total.....	\$567,352,733

INSOLVENT BANKS.

Since November 1, 1877, receivers have been appointed for banks in operation at that date, as follows:

Third National Bank of Chicago, Ill.....	Capital.
Central National Bank of Chicago, Ill.....	\$750,000

savings banks, and their average capital and deposits and the taxes thereon for the six months ending May 31, 1878:

States and Territories.	No. of banks.	Capital.	D. posits.	* Tax on

* Cents omitted.

Section 332 of the Revised Statutes requires the Comptroller to report to Congress the resources and liabilities of banks other than national, so far as such information can be obtained by him. Statements showing the condition of the State and savings banks of New York and New England are readily obtained for this purpose from the State authorities. A summary of these, and of returns showing the condition of the State banks of New Jersey, Pennsylvania, Maryland, Ohio, Louisiana, Kentucky, Michigan, Wisconsin, Minnesota, Kansas and California, is given in the appendix. Complete returns are also given showing the condition of the savings banks of New England, New York, New Jersey, Ohio and California. It will be seen that complete returns of State banks have been received from seventeen States only, of savings banks from but ten States, and of trust and loan companies from five only. The laws of fourteen States do not require returns to be made by banking associations to any State official. The tables referred to do not therefore present a satisfactory exhibit of the condition of the resources and liabilities of the State banks and savings banks of the country.

JOHN JAY KNOX,
Comptroller of the Currency.

—The Plumas National Quartz Mining Company, No. 77 Cedar street, give notice of their tenth monthly dividend of ten cents per share, payable December 17, in gold. The yield of this mine for November is reported at \$16,039, and expenses \$4,864, leaving a surplus, after paying dividend, of \$2,175 for the month of November. The management of this mine, as we are informed, is under the direction of gentlemen of high character and of large experience in quartz mining. Messrs. L. P. Bayne & Co., 54 Broad street, are the sole agents for the sale of stock.

[From our own correspondent.]

LONDON, Saturday, November 23, 1878.

The nominal rate of discount at the Bank of England has been reduced to 5 per cent, a change which was scarcely avoidable, as the open market rates of discount have, for some time past, been at 4½ to 4¼ per cent. The Bank return fully justifies the change which has been made, the proportion of reserve to liabilities having increased from 38.42 to nearly 41 per cent. It is evident that the Bank rate should have been lowered last week; not that its maintenance at 6 per cent, with money at 4½ per cent in the open market, exercised any influence on the exchanges, but because throughout the country there are many professional persons and retail traders who borrow money of their bank at Bank rate or one per cent above. In deeds, for instance, in which the lending or borrowing of money is referred to, Bank rate is more frequently the price charged. While a tradesman, requiring temporary assistance of his banker, has very frequently a sort of tacit agreement that if he requires some assistance to pay the wholesale houses until his customers' quarterly accounts are paid, he shall pay one per cent over Bank rate for the accommodation. These advances made to tradesmen are in the majority of cases very safe, and, within a moderate compass, is very fair banking business. It is profitable, but it is scarcely just for a man to pay 7 per cent instead of 6 per cent, simply because the Bank hesitated about making a change. Last week's statement quite justified a reduction. Furthermore, the reluctance shown by the authorities to make the change has tended to check a return of confidence. Every encouragement is wanted now. It is true that political affairs look more promising in southeastern Europe, and the indolent Turkish Government, having been stirred up to a sense of its obligations, seems much more willing to carry the Berlin Treaty to a successful issue. But we have now entered upon an Afghan war. The frontiers have been crossed, and before the severities of winter have been felt, some positions as starting points for the spring campaign will probably have been occupied. In the present state of the public mind, there are likely to be apprehensions as to the result of this war; but it seems that the Government is not desirous of doing more than rectify the northwestern frontier of India and make it secure. If the military authorities are unanimous in their opinion that the present frontier is not a satisfactory one, it should be rectified, now that an opportunity presents itself for doing so; but the English people are by no means desirous of seeing Afghanistan added to the British possessions. To make India secure is the principal object, and it is to be hoped that it will be accomplished without much bloodshed.

The increase in the reserve of the Bank of England amounts to as much as £342,049, due to a contraction of the note circulation and to an increase of £503,559 in the supply of bullion. The influx at the Bank, from foreign sources, during the week was only £85,000, and, consequently, a considerable return of coin from provincial circulation is indicated. At the same time, however, the total of "other deposits" continues heavy, being as much as £26,895,932, against about £20,000,000 last year. The banks are evidently therefore still anxious to hold large balances. The demand for money at the Bank having been very moderate, there is a further reduction of nearly £500,000 in the total of "other securities."

The rates of discount in the open market have not materially varied during the week, but the tendency has been to rise.

easier quotations. Very choice paper has been taken at 4½ per cent. There are very few bills offering, and they are more sought after. The rates of discount are now as follows:

Bank rate	Per cent.	Open-market rates	Per cent.
3 months' bills	5	4 months' bank bills	4½@4¼
6 months' bills	4½@4¼	6 months' bank bills	4½@4¼
3 months' bills	4½@4¼	4 and 6 months' trade bills	4½@5

The joint-stock banks and discount houses have reduced their allowance of interest for deposits one per cent. It is now 1½ per cent under Bank rate, and has been so for some time past. The banks are now adopting the wise course of paying less for deposits, but probably when trade revives, and there is more competition for money, the old process of cutting things finely will again be resorted to. The following are the present rates for money:

Joint-stock banks	Per cent.
Discount houses at call	3½
Discount houses with 7 days' notice	3½
Discount houses with 14 days' notice	3½

Annexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of Consols, the average quotation for English wheat, the price of middling upland cotton, of No. 40 mule twist, fair second quality, and the Bankers' Clearing House return, compared with the four previous years.

There has been no important movement in the market for gold, but of silver the German Government has again become a seller, and as there is scarcely any demand for the East, the market is weak. Mexican dollars are scarce, and their value has had an upward tendency. The following prices of bullion are from Messrs. Pixley & Abell's circular:

GOLD.		s.	d.	s. d.
Bar Gold, fine	per oz. standard	77	9	③
Bar Gold, refinable	per oz. standard	77	10½	③
Spanish Doubloons	per oz.	73	9	③
South American Doubloons	per oz.	73	9	③
United States Gold Coin	per oz.	76	3½	③
German gold coin	per oz.	76	3½	③
SILVER.		d.	d.	
Bar Silver, fine	per oz. standard	10½	②	10½
Bar Silver, con'g 5 grs. Gold	per oz. standard	50½	②	51
Mexican Dollars	per oz.	49	②	③
Chilian Dollars	per oz. last price	49	②	③
Quicksilver	26 12s. 6d. D account, 3 per cent.			

The bills on India offered on Wednesday were partly disposed of at 1s. 7 5-16d. and 1s. 7½d. on Calcutta and Bombay respectively.

The following are the current rates of discount at the principal foreign markets:

	Bank rate.	Open rate.	mark't.	Bank rate.	Open rate.	mark't.
Paris	3	2½@2¼		St. Petersburg	6	4½
Brussels	4½	3½@4		Vienna and Trieste	4½	4½@4¼
Amsterdam	4	4		Madrid, Cadiz and Barcelona	6	6½
Berlin	5	4½@4¼		Lisbon and Oporto	5	5½
Hamburg	5	4½@4¼		New York	3	4½@4¼
Frankfurt	5	4½@4¼		Copenhagen	4½	4½@4¼
Leipzig	5	4				
Genoa	4	4				
Geneva	4	4				

The wheat trade has continued to rule very quiet. Choice qualities of produce are firm in value; but the value of other sorts has been with difficulty maintained.

During the week ended Nov. 16, the sales of home grown wheat in the 150 principal markets of England and Wales amounted to 54,740 quarters, against 40,970 quarters last year; and it is estimated that in the whole Kingdom they were 219,000 quarters, against 164,000 quarters in the corresponding period of 1877. Since harvest the sales have been 678,870 quarters, against 578,443 quarters, in the 150 principal markets, while in the whole Kingdom it is computed that they have been 2,715,480 quarters against 2,314,000 quarters in the corresponding period of last season. Without reckoning the supplies furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and flour have been placed upon the British markets since harvest:

	1878.	1877.	1876.	1875.
Imports of wheat	12,372,873	14,246,333	8,292,177	16,439,495
Imports of flour	1,357,778	1,626,757	1,425,099	1,427,942
Sales of home-grown produce	11,767,100	10,026,500	11,159,500	9,927,000
Total	25,697,751	25,949,650	20,876,776	27,794,437
Exports of wheat and flour	616,620	538,505	292,056	70,856
Result	25,081,131	25,411,144	20,584,720	27,723,581
Aver. price of Eng. wheat for season	41s. 6d.	55s. 7d.	47s. 0d.	47s. 3d.

The following figures show the imports and exports of cereal produce into and from the United Kingdom since harvest, viz., from the first of September to the close of last week, compared with the corresponding period in the three previous years:

	1878.	1877.	1876.	1875.
Wheat	12,372,873	14,246,333	8,292,177	16,439,495
Barley	8,764,313	2,889,431	3,430,380	2,703,652
Oats	2,738,760	2,734,446	2,738,137	2,732,644
Peas	411,522	369,599	3,0416	220,450

Commercial and Miscellaneous News.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show an increase in both dry goods and general merchandise. The total imports were \$5,748,683, against \$5,369,231 the preceding week and \$3,928,194 two weeks previous. The exports for the week ended Dec. 3 amounted to \$7,193,710, against \$6,783,264 last week and \$6,365,550 the previous week. The following are the imports at New York for week ending (for dry goods) Nov. 28 and for the week ending (for general merchandise) Nov. 29:

	1878.	1877.	1876.	1875.
Dry Goods	\$1,446,661	\$903,589	\$933,930	\$959,254
General merchandise	7,003,465	2,497,952	4,478,738	4,788,829

Total for the week. \$5,447,126 \$3,401,541 \$5,432,058 \$5,748,683
Previously reported.... 297,997,110 238,409,347 291,627,021 238,164,806

Since January 1... \$306,444,236 \$361,810,888 \$297,059,079 \$261,933,489

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending Dec. 3:

	1878.	1877.	1876.	1875.
For the week	\$5,447,126	\$3,401,541	\$5,432,058	\$5,748,683
Previously reported	297,997,110	238,409,347	291,627,021	238,164,806

Since January 1... \$293,719,481 \$247,656,508 \$270,619,265 \$221,361,894

The following will show the exports of specie from the port of New York for week ending Nov. 30, 1878, and also a comparison of the total since Jan. 1, 1878, with the corresponding totals for several previous years:

Nov. 25—Str. Gilbert	London	Amer. silver bars	\$10,000
Nov. 30—Str. Donau	Southampton	Mex. gold bullion	6,025
		Mex. silver	26,728
		Mex. silver dols.	77,660
	London	Mex. silver dols.	40,000

Total for the week (\$184,383 silver, and \$5,025 gold)..... \$190,408
Previously reported (\$5,781,319 silver, and \$5,809,409 gold)..... 11,590,738

Total since Jan. 1, 1878 (\$5,965,712 silver, and \$3,815,434 gold)..... \$11,781,146

Same time in—	1878.	1877.	1876.	1875.
1877	\$25,278,187	1871	\$60,502,501	
1876	42,340,285	1870	57,538,762	
1875	67,650,845	1869	30,536,829	
1874	51,616,384	1868	69,854,117	
1873	47,427,703	1867	45,388,574	
1872	68,261,332	1866	69,149,044	

The imports of specie at this port during the same periods have been as follows:

Nov. 25—Str. Acapulco	Aspinwall	Amer. silver	\$9,207
		Foreign silver	27,000
		Amer. gold	462
		Gold dust	726

Nov. 27—Str. City of Paris..... St. Thomas..... Amer. silver..... 4,345
Nov. 29—Str. Atlas..... Port-au-Prince..... Amer. silver..... 1,800
Foreign gold..... 2,339

Nov. 29—Str. Emily B. Souder. Porto Plata..... Amer. silver..... 20,122
Nov. 29—Schr. City of Chester..... Nassau..... Amer. silver..... 918
Nov. 29—Str. City of Washington. Havana..... Amer. silver..... 202

Total for the week (\$67,937 silver, and \$5,227 gold)..... \$72,624
Previously reported (\$11,350,190 silver, and \$7,129,959 gold)..... 18,480,149

Total since Jan. 1, 1878 (\$11,417,557 silver, and \$7,135,186 gold)..... \$18,552,773

Same time in—	1878.	1877.	1876.	1875.
1877	\$14,336,816	1871	\$8,461,330	
1876	15,640,115	1870	11,492,784

Balance, Dec. 6..... 122,962,139 38 46,705,225 49

The usual monthly dividend of fifty cents per share has been declared for November by the Ontario Silver Mining Company, payable on the 16th inst. Advices from the mine report the mill in operation again and the mine being prepared for a large out-put of ore. The new furnace is also completed, by which a material increase in the producing power of the company is expected.

The Bankers' Gazette.

New York New Hav. & Hartford	5	Jan. 2.	Dec. 4 to Jan. 9

FRIDAY, DEC. 6, 1878-5 P. M.

The Money Market and Financial Situation.—The general situation has not materially changed since our last report. The meeting of Congress has thus far been unattended by any definite action, which indicates at all clearly the probable course of financial legislation at this session of Congress. There is some evidence of an unfavorable sentiment towards the New York banks on account of their resolution to take silver only as a special deposit after January 1, 1879. But in case of no further injurious legislation on the silver question, it is possible that the banks might deem it advisable to reconsider their action on this subject.

Our money market has worked easily and has the prospect of an abundant supply of funds in coming months. Call loans have ranged during most of the week at 2 1/4 to 4 per cent, but on Wednesday and Thursday there was an exceptional advance in the afternoon to 5 to 6 per cent. Prime commercial paper is in demand at 4 to 5 1/4 per cent for choice grades.

The Bank of England statement on Thursday showed a decrease for the week in bullion of £139,000, and the percentage of reserve to liabilities was 40 1/2 per cent, against 41 15-16 the previous week. The Bank of France gained 291,000 francs in specie.

The last statement of the New York City Clearing-House banks, issued November 30, showed an increase of \$337,400 in the excess above their 25 per cent legal reserve, the whole of such excess being \$12,543,800, against \$12,206,400 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years.

	1878. Nov. 30.	Differences fr'm previous week.	1877. Dec. 1.	1876. Dec. 2.
Loans and dis.	\$236,438,400	Inc. \$1,520,700	\$238,429,600	\$256,589,700
Specie	22,967,400	Dec. 447,000	15,324,000	20,184,100
Circulation	20,007,000	Inc. 45,100	18,110,300	14,952,800
Net deposits	206,797,200	Dec. 337,600	196,961,500	207,322,000
Legal tenders.	41,275,700	Inc. 687,500	40,579,800	39,823,700

United States Bonds.—There has been only a moderate business in governments. Between London and this market there are very few transactions, and at home the general demand has slackened up, so far as concerns purchases in the open market; but subscriptions to the new 4 per cents are reported as keeping up very fairly.

Closing prices at the N. Y. Board have been as follows:

State and Railroad Bonds.—Among State bonds the Louisiana consols have attracted most attention, breaking down sharply

in their prices and selling Thursday afternoon at 7 1/4. The decline here appears to have been caused by a break in New Orleans, where heavy sales took place for account of parties who had recently been buying the market. Virginia bonds are very strong for the 'pealers, but weaker on the consols, in consequence of the possibility that the two bonds may be equalized by the issue of new bonds in place of all of them. The proposition made by Messrs. Baring Bros. & Co. de Rothschild, Brown Bros. & Co., and others, representing large holders of bonds, suggests that a 4 per cent gold bond be issued for consols, and a 3 1/2 per cent gold bond in place of all other classes of bonds. Tennessee bonds have been stronger, and also North Carolinas. The United States Supreme Court has decided that Tennessee must receive for taxes the new issue of money, better known as the "war issue" of the Bank of Tennessee. About \$300,000 of this war issue is now outstanding, and is mostly in the hands of speculators. This decision will apparently be prejudicial to the payment of the State debt, as the Legislature will have to provide for the redemption of these notes in taxes.

Railroad bonds have been quite active still, with prices strong, although in the case of those bonds sold largely on speculation, some temporary fluctuations in price are noticed.

The following securities were sold at auction:

Shares.	Shares.
84 Leather Manfrs. Nat. Bk. 135	160 Metrop. Life Ins. 50
20 Am. Metaline Co. 5	20 Island City Bank 80

* This is the price bid; no sale was made at the Board.

Railroad and Miscellaneous Stocks.—The stock market has been marked this week rather by movements in particular stocks than for any general activity either on the bull or bear side. The higher prices of the Northwests, common and preferred, have been supported by the declaration of dividends on both classes of stock; the 2 per cent on common being paid, as the directors state, out of the surplus for the fiscal year ending May 31, 1878. The coal-road stocks have been further depressed by the prospect that the combination may not be renewed for 1879, and by the present decline in coal. Pacific Mail fell off to 12 1/4, on the supposition that the agreement with the Pacific railroads would not be renewed, but there was a misunderstanding in regard to this, and the price afterward recovered. The trunk line agreement to keep up for five years the pool on west-bound freight, was calculated to give strength to the stocks most affected thereby.

The daily highest and lowest prices have been as follows:

	Saturday, Nov. 30.	Monday, Dec. 2.	Tuesday, Dec. 3.	Wednesday, Dec. 4.	Thursday, Dec. 5.	Friday, Dec. 6.

* October figures include earnings of Proprietary Roads.

Gold and Silver.—Gold advanced on Nov. 30 to 100 1/4, and borrowers paid 1-64 per day, but afterwards the price fell back again and closes at 100 1/4. On gold loans the rate to-day was flat to 2 per cent for carrying. Silver is quoted in London at 50 1/2 per oz. The Treasury bought at Washington the usual 300,000 to 400,000 ounces of silver, on "private terms." In regard to the trade dollars, which it is proposed to change into legal-tender dollars, Secretary Sherman says the total amount of trade dollars coined is \$35,950,860. The amount exported is \$25,815,950, and the Chinese returning home are estimated to have taken \$5,000,000, which would leave in the United States \$5,134,910.

The range of gold, and clearings and balances, were as follows:

	Quotations.				Gold Clearings.		Balances.	
	Open.	Low.	High.	Clos.	Gold.	Currency.	Gold.	Currency.
Nov. 30.	100 1/4	100 1/4	100 1/4	100 1/4	\$18,060,000	\$2,179,675	\$2,185,107

Exchange.—In foreign exchange there has been a fair business only. To-day, bankers were firm and advanced their asking rates for sterling bills to 4-8 1/2 for sixty days, and 4-8 1/2 for demand. Actual transactions were made about 1/2 point below these prices.

In domestic bills the following were rates on New York at the undermentioned cities to-day: Savannah, buying at par, selling @ 1-1/2 premium; Charleston easy, buying par @ 1-1/2 premium, selling @ 3-1/2 premium; New Orleans, commercial, 3/4; bank, 1/2; St. Louis, par; Chicago firm, buying 1-10 discount, selling 1-10 premium; and Boston, 25 premium.

Quotations for foreign exchange are as follows:

	Dec. 6.	60 days.	3 days.
Prime bankers' sterling bills on London.	4.81 3/4 @ 4.82 1/2	4.86 1/4 @ 4.87	4.86 1/4 @ 4.87

Investments

AND
STATE, CITY AND CORPORATION FINANCES.

The INVESTORS' SUPPLEMENT is published on the last Saturday of each month, and furnished to all regular subscribers of the CHRONICLE. No single copies of the SUPPLEMENT are sold at the office, as only a sufficient number is printed to supply regular subscribers. One number of the SUPPLEMENT, however, is bound up with THE FINANCIAL REVIEW (Annual), and can be purchased in that shape.

ANNUAL REPORTS.

Lake Shore & Michigan Southern.

(For the year ending September 30, 1878.)

From the returns made to the New York State Engineer the following figures are taken:

Total.....	\$745,110	\$767,477	
Number of passengers carried.....	14,389,993	14,752,900	

GENERAL INVESTMENT NEWS.

Anthracite Coal Combination.—The monthly meeting of the Anthracite Board of Control was held on Thursday. It was decided to increase the allotment for Dec. 1,000,000 tons, making the total out-put for this month 3,000,000 tons and for 1878 18,000,000 tons, against 20,874,000 tons last year. The following table shows the proportions of the increase allotted to each of the companies:

	Tons.
Philadelphia & Reading Railroad Company.....	286,250
Lehigh Valley Coal Company.....	197,500
Central Railroad of New Jersey.....	129,050
Delaware Lackawanna & Western Railroad Company.....	127,000
Delaware & Hudson Canal Company.....	121,500
Pennsylvania Railroad Company.....	76,250
Pennsylvania Coal Company.....	53,670
Total.....	1,000,000

The next meeting of the Board will be held December 27, and on or before that date the committee representing all the other interests except the Lehigh Valley are to meet Messrs. Swoyer and others of the last-named company, to decide upon the continuation of the combination in 1879. The Lehigh Valley operators are dissatisfied with their allotment for 1878, but voted at their recent meeting that "we believe the best interests of the trade demand that some arrangement be made for the government of the trade for the year 1879, by which the production of coal shall be restricted to the demand, upon an equitable basis, satisfactory to all parties in interest."

Chicago & Northwestern.—A meeting of the Board of Directors of the Chicago & Northwestern Railway Company was held in this city on Thursday, at which the following resolutions were adopted:

Resolved, That a dividend of three and a half per cent on the preferred capital stock of the company be and is hereby declared out of the net earnings of the present fiscal year, payable at this office on the 28th of December inst.

Resolved, That a dividend of two per cent on the common stock of this company be and is hereby declared out of the surplus earnings and moneys of the fiscal year ending on the 31st of May, 1878.

A protest, signed by Rufus Hatch, was handed to the Board, in which was the following:—"I demand and insist that no dividend be paid on the common stock until the seven per cent to which the preferred stock is entitled shall have been paid." Accompanying this was an opinion from the law firm of Brown, Green & Vanderpoel, that a dividend cannot be declared upon the common stock until seven per cent has been paid for the year on the preferred. No action was taken on the protest, and at the office of the company it was stated that for the year ending May 31, 1878, a dividend of seven per cent on the preferred stock had been declared and paid, leaving a surplus of more than sufficient to pay the two per cent dividend on the common stock now declared. They said that no dividend had been declared on the common stock for the half-year just past.

The following is the official statement of the company submitted at the meeting of the directors:

OFFICE OF CHICAGO & NORTHWESTERN RAILWAY CO., 52 Wall street.

Half-Yearly Comparative Statement, with Earnings and Expenses of November, 1878, closely approximate.

Leaving old balance, May 31, 1878..... \$208,808
New York, Dec. 5, 1878. M. L. SYKES, Treasurer.

Denver & Rio Grande.—At a meeting of the stockholders of this company, held at Colorado Springs, the lease of the road to the Atchison Topeka & Santa Fe Railroad Company was ratified by a vote of 80 per cent of the total stock. The lease has now gone into effect. Stock of the Denver & Rio Grande Company, and of the Pueblo & Arkansas Valley Railroad Company has been deposited at Boston with Mr. T. Jefferson Coolidge, as Trustee, to an amount necessary to make binding the recent agreement for the exchange and equalization of the stocks of the two companies.

Hannibal & St. Joseph.—The *World* money article speaks of this company's finances as follows: "The company's earnings for 9 months ending September 30 were \$1,426,245 gross and \$552,402 net; the expenses were \$873,843, or 61.27 per cent. The gross earnings for October were \$248,288, the net earnings not yet completely ascertained; November, with fourth week estimated,

about \$200,000. The cash in hand, exclusive of \$4410 held to await presentation of past-due coupons, is \$181,130 in general account and \$4968 from proceeds of "free lands," i. e., lands not covered by the land bonds. The pay-roll for October is cleared off; the last payments were made on November 23. Supply bills are paid up closely. The company has its paper outstanding as follows: \$24,000 on account of the elevator purchases of last year, about \$44,000 in payment for 1,000 tons of steel and other notes under a new car contract. Heretofore the company hired 200 freight cars, at a rental of \$10.50 monthly per car. In place of this the company has bought 250 cars, paying \$41 per car in cash, and engaging to pay \$8.10 per car monthly for 5 years, at the end of which time the cars become its property. These payments can be anticipated at a rebate of 8 per cent per annum. Of the \$1,000,000 of land bonds, of which the Farmers' Loan & Trust Company is trustee, \$419,000 have not been sold, and the company is not open to offers for them, nor were any of them included in the last drawing. Of the remaining \$581,000 there have been drawn and paid off \$100,600, and \$25,000 are now under notice and advertised, with nearly enough collections on hand to call in \$25,000 more; which will make \$150,000 paid off or notified for payment within the year of their issue.

Missouri Kansas & Texas—Union Pacific Southern Branch.—The Missouri Kansas & Texas Railway is a consolidated line embracing the former Union Pacific Southern Branch. The first mortgage on the latter road is prior to the M. K. & T. consolidated mortgage, and covers the valuable land grant in the State of Kansas. Messrs. Russell Sage and N. A. Cowdry are trustees of the U. P. South Branch mortgage, and, as such trustees have brought a suit against the Union Trust Company and others in the Superior Court of this city. The trust company is the trustee of the junior consolidated mortgage. The *Times* says: "The present action is really for the construction of the first mortgage, and is to decide whether the revenues in the hands of the trust company as trustee, and derived from the sale of lands belonging to the railway company, shall be paid in gross to the trustees of the first mortgage or be applied first toward the expenses of selling the lands, then toward the payment of the taxes on the lands unsold, and the net proceeds handed over to the trustees of the first mortgage. The latter insist that they are entitled to receive the gross proceeds. About \$300,000 are involved in the case."

St. Louis Alton & Terre Haute—Indianapolis & St. Louis.—Judge Gresham, at Indianapolis, rendered judgment, in the case between these companies and the several guarantors, that, "until final hearing, the I. & St. L. will be required to pay into court monthly, for and on account of said rental, 30 per cent of the gross earnings of the leased line, and it will be enjoined from paying to the C. C. & I., the L. S. & M. S., the P. Ft. W. & C., the Pennsylvania Railroad Company and the Pennsylvania Company interest on any of the mortgages or equipment bonds, owned or held by said companies, or either of them, so long as 30 per cent of said gross earnings shall not equal the minimum rental; also from paying to said companies, or either of them, any moneys on account of advances made as aforesaid by them, or either of them."

Tennessee State Debt.—The bondholders' committee has made a new proposition for settlement by offering to take new bonds at 4 per cent interest instead of the former proposition of scaling the principal of the debt to 60 per cent of its face in new 6 per cent bonds.

Toledo Peoria & Warsaw.—Judge Drummond in Chicago made an order directing the payment of the quarterly installment of the interest upon the first mortgage bonds. The apportionment is as follows: To the holders of bonds on the eastern division \$21.92 on each \$1,000 bond; to the holders of western division first mortgage bonds, \$21.68; and to holders of first mortgage bonds on the Burlington division, \$13.14. The total amount to be expended is \$90,000.

Trunk Line Pool.—At the conference of the managers of the Trunk Lines, for the purpose of considering the continuance of the West-bound freight pool, a resolution was adopted providing for the continuance of the arrangement for five years from January 1, 1879, and investing the Trunk Line Commissioner with absolute authority to hear and decide the claims of any road for an increased percentage of traffic.

—The York Street Flax Spinning Company (Limited) of Belfast, Ireland—office in New York at 101 Franklin street—have just been awarded the only gold medal at the Paris Exposition for fine linen goods of all descriptions. This concern is the largest in the linen trade, having, besides their factory in Belfast, large houses in Moscow, St. Petersburg, Hamburg, Copenhagen, Stockholm, Milan, Naples, Barcelona, Oporto and New York city. In the latter, Mr. J. A. Scott is the popular representative. They employ a nominal capital of \$2,500,000, but the business requires upwards of \$3,500,000, and the concern possesses a large reserve fund besides, in order to carry on its growing trade. The factories cover about four acres of ground, and employ upward of three thousand operatives. The reputation of the manufactures is world-wide, especially their dress, clothing and household linens.

—We call attention to the notice of the twenty-first dividend of 1 per cent of the Hukill Gold and Silver Mining Company, of Spanish Bar, Colorado. This mine has produced largely so far, and the reports from it continue to give good accounts. Mr. S. V. White, the Treasurer, has been prominent in Wall street for years past, and the mine is therefore not represented here by any adventurer.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, December 6.

There is a quiet tone pervading commercial circles, and low as prices were, some further reduction has been made for the leading staples the past week. It is announced from Washington that the administration is satisfied with the position and prospects, as regards the proposed resumption of specie payments on the first proximo, and that no general legislation affecting import duties will be attempted at the present session of Congress. The weather has become clear and cold, and the recent rains have put the rivers of the Southwest in fair boating condition.

The following is a statement of the stocks of leading articles of domestic and foreign merchandise at dates given:

	1878.	1878.	1877.
	Nov. 1.	Dec. 1.	Dec. 1.

Jute butts.....	bales. 20,300	22,400	21,300
Manila hemp.....	bales. 30,400	28,617	35,654

Provisions have been moderately active, but at drooping prices, and for many articles the closing figures of to-day are not only the lowest of the season, but for a generation. Old mess pork closed offered at \$7 45 for December and January, and new mess at \$8 75 for February and \$9 for March. Lard declined to \$6 02½ for prime Western, and sold at \$6 05 for January, \$6 10 for February and \$6 17½ for March. Bacon has sold fairly at 4½c. for Western, long and short together, for December delivery. Cut meats have declined ¼c. per lb. Butter and cheese without essential change. Tallow has been firmer at 6½@6¾c. for prime to choice, but the close is quiet. Stearine is active at 6½c. for prime city.

Kentucky tobacco, though in fair demand, has not been so active as last noticed. Sales for the week are 1,100 hds., of which 800 for export and 300 for home consumption. Lugs are quoted at 2½@5c., and leaf 5½@13c. Seed leaf has also been quiet, the sales for the week being limited to 1214 cases, as follows: 750 cases 1877 crop, Pennsylvania, 10@22c.; 38 cases 1876 crop, New England, 8@11c.; 160 cases 1877 crop, State, private terms; and 266 cases 1877 crop, Wisconsin, part at 7@14c. There has continued a good demand for Spanish tobacco, and the sales are 650 bales Havana at 85c.@\$1 10, and 76 bales Yara, private terms.

The coffee market has latterly been rather quiet, but early in the week quite a fair movement was noted; quotations are now rather easy, fair cargoes of Rio being quoted at 14c., with a stock here in first hands of 79,390 bags. Mild grades have been quite active, 11,766 mats Java having been sold previous to arrival, and 4,092 bags other grades, in lots for consumption. Rice and molasses have been in jobbing sale only, but remain steady. Refined sugars, at the moment, are steady, though quiet; standard crushed, 9½@9¼c. Raw grades have been alternately weak and steady, the close being quite indifferent. Fair to good refining Cuba was quoted as 6¼@7c.

Ocean freight room, both berth and charter descriptions, has been in fair call, principally from the grain and flour trades; rates were steady until the close, when those for berth tonnage were rendered irregular and weak by superfluous arrivals. Late engagements and charters include: Grain to Liverpool, by steam, 7@7¼d. per 60 lbs.; cotton, 4d. per lb.; bacon, 37s. 6d. per ton; cheese, 47s. 6d.@50s.; grain to London, by steam, 8½d.; do., by sail, 7½d.; flour, 2s.; grain to Bristol, by steam, 8½d.; do., to Cork for orders, 5s. 8d.@6s. per qr.; do., to the North Roads, 5s. 3d.; do., to French ports, 5s. 6d.; refined petroleum to the United Kingdom, 4s.; do., to the Baltic, 4s. 10½d.; do., to London, 3s. 6d.@3s. 9d. To-day, grain to Liverpool, by steam, 7d.; do., to London, by steam, 7½d.; do., to Bordeaux, 5s. 9d.; petroleum products to Liverpool, 4s.

There has been a large movement in steel rails, 67,000 tons having been taken, as follows: 42,000 tons to the Pennsylvania RR., 6,000 tons to Chicago buyers, and 19,000 tons for local uses, at an average price of \$43 at tide-water. The business in naval stores has continued limited, but quotations remain steady; common to good strained, \$1 37@1 40; spirits turpentine, 29½c. Petroleum has been at a standstill, but nominally steady at 9c. for refined in bbls. and 12@14c. for do. in cases. Ingot copper was more active and steady, with 250,000 lbs. Lake sold at 15½@16c. Clover seed closes with a good demand at 6¼@7c. for Western and State per lb. Whiskey has advanced to \$1 08½.

COTTON.

FRIDAY, P. M., December 6, 1878.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Dec. 6), the total receipts have reached 220,748 bales, against 184,625 bales last week, 181,376 bales the previous week, and 176,004 bales three weeks since; making the total receipts since the 1st of September, 1878, 1,950,982 bales, against 1,678,882 bales for the same period of 1877, showing an increase since September 1, 1878, of 277,100 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of four previous years are as follows:

Receipts this w'k at	1878.	1877.	1876.	1875.	1874.
New Orleans.....	77,421	53,201	54,532	61,011	58,196
Mobile.....	24,931	19,063	19,775	17,542	23,507
Charleston.....	13,772	23,404	23,374	17,771	19,260
Port Royal, &c.....	996	1,946	2,154	722	531
Savannah.....	21,887	27,112	22,715	22,962	23,518
Galveston.....	30,316	22,112	27,843	13,697	21,847
Indianola, &c.....	892	341	475	616	651
Tennessee, &c.....	16,806	8,561	8,188	13,015	5,595
Florida.....	2,047	592	1,951	633	407
North Carolina.....	4,991	10,380	5,361	4,025	3,975
Orfolk.....	16,683	6,259	19,503	19,336	16,071
Point, &c.....	4,956	1,394	1,862	1,521	1,427
Total this week...	220,748	174,365	187,733	172,901	180,065
Total since Sept. 1.	1,950,982	1,673,882	2,031,398	1,763,886	1,633,424

The exports for the week ending this evening reach a total of 16,020 bales, of which 83,736 were to Great Britain, 28,500 to France, and 70,784 to rest of the Continent, while the stocks as made up this evening are now 622,424 bales. Below are the stocks and exports for the week, and also for the corresponding week of last season.

Week ending Dec. 6.	EXPORTED TO—			Total this Week.	Same Week 1877.	STOCK.	
	Great Britain.	France.	Continent.			1878.	1877.
N. Orleans.....	28,829	15,279	29,198	73,306	52,965	187,298	246,974
Mobile.....	1,427	1,462	2,889	5,300	40,276	50,577	50,577
Charl'tn.....	2,637	4,057	1,750	8,444	2,400	83,151	76,232
Savannah.....	8,426	27,436	35,862	7,080	66,993	100,795	100,795
Galv'tn.....	17,371	6,997	7,752	32,120	2,516	114,784	85,444

Norfolk.....	7,611	7,611	7,611	23,737	18,633
Other*.....	15,122	2,598	17,720	11,393	38,000	59,000
Tot. this week.....	86,736	28,500	70,784	186,020	91,318	622,424	724,332
Tot. since Sept. 1.	618,233	113,765	302,310	1,034,308	743,738

* The exports this week under the head of "other ports" include, from Baltimore, 1,800 bales to Liverpool; from Boston, 7,531 bales to Liverpool; from Philadelphia, 431 bales to Liverpool; from Wilmington, 1,240 bales to Liverpool; and 2,598 to Continent; from Port Royal, 3,700 bales to Liverpool.

In addition to above exports, our telegrams to-night also give us the following amounts of cotton on shipboard, not cleared, at the ports named. We add also similar figures for New York, which are prepared for our special use by Messrs. Carey, Yale & Lambert, 60 Beaver street:

DEC. 6, AT—	On Shipboard, not cleared—for					Leaving Stock.
	Liverpool.	France.	Other Foreign.	Coast-wise.	Total.	
New Orleans.....	18,250	27,000	16,000	100	61,350	126,000
Mobile.....	3,500	5,000	5,550	None.	14,050	26,226
Savannah.....	13,000	3,500	7,000	1,500	25,000	41,993
Galveston.....	29,729	13,798	7,701	5,226	56,454	58,330
New York.....	1,500	1,000	1,200	None.	4,300	63,885
Total.....	65,979	50,298	37,451	6,826	161,154	316,434

* Included in this amount there are 600 bales at Presses for foreign ports, the destination of which we cannot learn.

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 94,702 bales, while the stocks to-night are 102,408 bales less than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Nov. 29, the latest mail dates:

PORTS.	RECEIPTS SINCE SEPT. 1.		EXPORTED SINCE SEPT. 1 TO—				Stock.
	1878.	1877.	Great Britain.	France.	Other Foreign.	Total.	
N. Orleans.....	257,716	393,649	62,196	26,390	57,321	145,907	175,296

Norfolk.....	235,821	203,807	66,995	66,995	23,395
Other*.....	44,890	20,452	52,588	8,248	60,836	16,500
This yr. 1730,234	561,547	85,265	232,026	878,838	611,306
Last yr. 1499,517	427,269	105,304	119,897	652,470	676,616

* Under the head of Charleston is included Port Royal, &c.; under the head of Galveston is included Indianola, &c.; under the head of Norfolk is included City Point, &c.

These mail returns do not correspond precisely with the total

of the telegraphic figures, because in preparing them it is always necessary to incorporate every correction made at the ports.

The market the past week has been only moderately active for cotton on the spot, although the demand has been general—for export, consumption, speculation, and in transit—and prices have declined. Quotations were reduced 1-16c. on Tuesday; Wednesday and Thursday, prices were very weak, and to-day quotations were further reduced 1-16c., to 9½c. for middling uplands. The speculation in futures has been dull, and prices show a reduction. The opening on Saturday was rather dearer, but there was a slight decline on Monday and Tuesday, opening at some further reduction on Wednesday morning.—December selling at 9-11, January at 9-19, and February at 9-30, but there was a recovery towards the close of that day, and the final figures were little changed from Tuesday, although transferable orders were 5 points lower. Yesterday, there was a further decline of 6@10 points, most conspicuous in the early months. The depression has been caused, ostensibly, by the unfavorable foreign advices and the increased movement of the crop, there being as a result a gradual loss of confidence in the stability of current values. A flurry in the money market was also an element of weakness yesterday. To-day, there was a further slight decline, and a very unsettled closing, the decline for week being from 15 to 16 hundredths.

The total sales for forward delivery for the week are 320,500 bales, including — free on board. For immediate delivery the total sales foot up this week 4,900 bales, including 1,449 for export, 2,552 for consumption, 549 for speculation and 350 in transit. Of the above, 250 bales were to arrive. The following tables show the official quotations and sales for each day of the past week:

Nov. 30 to Dec. 6.	UPLANDS.			NEW ORLEANS.			TEXAS.

THE VISIBLE SUPPLY OF COTTON, as made up by cable and telegraph, is as follows. The Continental stocks are the figures of last Saturday, but the totals for Great Britain and the afloat for the Continent are this week's returns, and consequently brought down to Thursday evening; hence, to make the totals the complete figures for to-night (Dec. 6), we add the item of exports from the United States, including in it the exports of Friday only:

	1878.	1877.	1876.	1875.
Stock at Liverpool.....	329,000	312,000	463,000	434,000
Stock at London.....	33,500	17,500	38,250	55,250
Total Great Britain stock ..	362,500	329,500	501,250	539,250

Total, all.....	112,631	82,263	236,280	94,064	82,073	169,073

The above totals show that the old interior stocks have increased during the week 19,839 bales, and are to-night 48,384 bales more than at the same period last year. The receipts at the same towns have been 11,995 bales more than the same week last year.

RECEIPTS FROM THE PLANTATIONS.—Referring to our remarks in a previous issue for an explanation of this table, we now bring the figures down one week later, closing to-night:

This statement shows us that the receipts at the ports the past week were 220,748 bales, received entirely from plantations. Last year the receipts from the plantations for the same week were 174,365 bales, and for 1876 they were 187,733 bales.

WEATHER REPORTS BY TELEGRAPH.—The weather the past week has been showery in many sections, but generally light showers, and not interfering materially with farm work. The crop is being marketed freely.

Galveston, Texas.—We have had a shower on one day during the week, the rainfall reaching eleven hundredths of an inch. Picking is progressing finely, but approaches completion. Average thermometer 58, highest 68 and lowest 43. The rainfall during November has reached seven inches and twenty-two hundredths.

Indianola, Texas.—It has rained on one day the past week, a sprinkle, the rainfall reaching four hundredths of an inch. We have had a frost, but not a killing frost. The thermometer has ranged from 39 to 71, averaging 55. The rainfall for the month is five inches and ninety-seven hundredths.

Corsicana, Texas.—The days have been warm but the nights have been cold during the week, with a killing frost on one night. There has been no rain, and it is badly needed. The thermometer has averaged 53, ranging from 34 to 70. There has been a rainfall of two inches and sixty-nine hundredths during the month of November.

Dallas, Texas.—We have had warm days and cold nights during the past week, the thermometer averaging 53 and ranging from 34 to 70. We have had one killing frost, but no rainfall, and much wheat requires replanting on account of the drought. Rainfall for November, two inches and twenty-five hundredths.

Brenham, Texas.—Rain has fallen on one day of the week, a shower, and more is needed. Picking is nearly over. Average thermometer 57, highest 72, and lowest 45. The rainfall for the week is thirty hundredths of an inch, and for the month three inches.

New Orleans, Louisiana.—We have had rain on one day during the week, the rainfall reaching fifteen hundredths of an inch. The thermometer has averaged 51. There has been a rainfall during the past month of seven inches and ninety-seven hundredths.

Shreveport, Louisiana.—Pleasant weather prevails here. Between forty and forty-five per cent of the crop in this section has been marketed. Average thermometer during the week 41, highest 67 and lowest 35. The rainfall has reached forty hun-

dreths of an inch; and during the month of November three inches and fifty-six hundredths.

Vicksburg, Mississippi.—It has rained on one day this week, the rainfall reaching twenty-three hundredths of an inch. The thermometer has averaged 50, the extreme range having been 36 to 67.

Columbus, Mississippi.—Telegram not received.

Little Rock, Arkansas.—It was cloudy Saturday and Sunday last, with rain on Saturday, but the remainder of the week was clear and pleasant. The thermometer has averaged 45, the highest point reached having been 65, and the lowest 30. The rainfall for the past week is sixty-five hundredths of an inch. The thermometer has averaged 42 during the month of November, the extreme range having been 78 to 31. The rainfall for the same month is three inches and four hundredths.

Nashville, Tennessee.—Telegram not received.

Memphis, Tennessee.—Telegram not received.

Mobile, Alabama.—It has been showery one day, the rest of the week having been pleasant but cold. The thermometer has averaged 50, with an extreme range of 36 and 68. The rainfall for the week is five hundredths of an inch, and for the month of November six inches and thirty-one hundredths.

Montgomery, Alabama.—It has rained on one day, the rainfall reaching thirty-five hundredths of an inch, but the rest of the week has been pleasant, the thermometer averaging 48 and ranging from 34 to 62. The rainfall during the past month foots up four inches and ninety-three hundredths.

Selma, Alabama.—It rained on one day the earlier part of the past week, but the latter portion was clear and pleasant. Planters are sending their cotton to market freely.

Madison, Florida.—There has been rain here on one day, but the balance of the week has been pleasant. We have had a frost, but not a killing frost. The rainfall has reached eight hundredths of an inch. Average thermometer 50, highest 60, and lowest 40.

Macon, Georgia.—Rain fell on two days the earlier part of the past week, but the latter portion was clear and pleasant. Planters are sending cotton forward freely. At least two-thirds of the crop of this section has been marketed. Average thermometer 50, highest 60, and lowest 32.

Columbus, Georgia.—Rain has fallen on one day of the past week, the rainfall reaching fifty hundredths of an inch. The thermometer has averaged 60. The rainfall for the month of November is seven inches and twenty-seven hundredths.

Savannah, Georgia.—It has rained here on two days, the rainfall reaching twenty-two hundredths of an inch, but the balance of the week has been pleasant. The thermometer has averaged 53, the highest being 69 and the lowest 39.

Augusta, Georgia.—The weather has been cold and dry all the week. Planters are sending their cotton forward freely, about three-quarters of the crop having been marketed to date. Average thermometer 45, highest 61, and lowest 34.

Charleston, South Carolina.—It has been showery one day this week, the rainfall reaching seventeen hundredths of an inch. The thermometer has averaged 52, the highest being 66, and the lowest 39.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock Dec. 5, 1878. We give last year's figures (Dec. 6, 1877) for comparison:

	Dec. 5, '78.	Dec. 6, '77.
	Feet. Inch.	Feet. Inch.
New Orleans.....	Below high-water mark... 13 6	10 7
Memphis.....	Above low-water mark... 14 7	18 1
Nashville.....	Above low-water mark... 13 9	6 6
Shreveport.....	Above low-water mark... 4 9	23 11
Vicksburg.....	Above low-water mark... Missing.	23 4

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

BOMBAY SHIPMENTS.—According to our cable despatch received to-day, there have been — bales shipped from Bombay to Great Britain the past week and 1,000 bales to the Continent; while the receipts at Bombay during this week have been 6,000 bales. The movement since the 1st of January is as follows. These figures are brought down to Thursday, Dec. 5.

	Shipments this week			Shipments since Jan. 1.			Receipts.	
	Great Brit'n.	Conti-nent.	Total.	Great Brit'n.	Conti-nent.	Total.	This Week.	Since Jan. 1.
1878.....	1,000	1,000	2,000	322,000	399,000	721,000	6,000	900,000
1877.....	2,000	7,000	9,000	382,000	431,000	813,000	11,000	1,071,000
1876.....	8,000	8,000	16,000	579,000	401,000	980,000	8,000	1,086,000

From the foregoing it would appear that, compared with last year, there has been a decrease of 8,000 bales in the week's shipments from Bombay to Europe, and that the total movement since January 1 shows a decrease in shipments of 92,000 bales, compared with the corresponding period of 1877.

RECEIPTS FOR DECEMBER AND JANUARY.—We continue to-day, one month further (so as to include January, 1878), our table of weekly receipts at each port in 1877-78. The full statement for December and January is as follows. For the purpose of keeping the monthly totals separate, it will be seen that we have, as heretofore, divided the week where part of it is in one month and part in the following month. As for instance, the last week of December ended with January 4; hence, under January we give those four days and the other three days of the week are under December, and to obtain the total for that week the

two must be added. So, also, the last week of January is incomplete (being only for 6 days), the week closing on the first day of February; the remaining one day will, of course, be given in our next month's statement for February.

RECEIPTS AT THE PORTS, DECEMBER, 1877 AND JANUARY, 1878.

Total Jan...									

The receipts at the outports during November have not quite equalled expectations, being only 779,235 bales against 823,493 bales last year; or a decrease this year of 43,258 bales. This has been due, not by any means to the fact that the estimates of the crop have been too high, as many interpret it, but to peculiarities in the conditions this season. In the first place the interior quarantines were not raised as early as anticipated; and, even after they were, it took more time than was supposed to be necessary, for the movement to begin, as the bagging had to be secured and the cotton ginned and baled and hauled to the river landings before the steamers could load. Then, again, the rivers have been low all the month, as our telegraphic statement at the close of our weather report each week has shown; this too has had considerable influence on the movement. Finally, stocks have been accumulating at the interior ports more rapidly than last year. As for instance, on the 1st day of November (see CHRONICLE Nov. 2, page 465,) the total of the interior stock we give was this year 115,034 bales against 105,814 bales same time 1877, while on the 29th day of November (see CHRONICLE Nov. 30, page 571,) they had reached this year 205,913 bales against 157,083 bales last year; in other words, the accumulation in Nov., 1878, was 90,878 bales against an accumulation of 51,268 bales in Nov., 1877. Add this difference to the port receipts and this year's movement will be found to be a little larger rather than smaller than last year, notwithstanding the disadvantages before stated.

We make no mention in the above of the reported holding back of cotton, for we do not believe this has been done to any greater extent than last year. December promises to record the largest movement of any month in our record.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT.—A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative

movement for the years named. First we give the receipts at each port each day of the week ending to-night.

PORT RECEIPTS FROM SATURDAY, NOV. 30, '78, TO FRIDAY, DEC. 6, '78.

Percentage of tot. port receipts Nov. 30 ..	34.50	44.91	36.25	38.53	37.51	37.51

This statement shows that up to Dec. 1 the receipts at the ports this year were 357,830 bales more than in 1877 and 56,173 bales less than at the same time in 1876. By adding to the above totals to Dec. 1 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

Percentage of total port receipts	37.87	48.89	39.50	42.49	31.35	31.35

This statement shows that the receipts since Sept. 1 up to to-night are now 305,211 bales more than they were to the same day of the month in 1877, and 23,311 bales less than they were to the same day of the month in 1876. We add to the last table the percentages of total port receipts which had been received Dec. 6 in each of the years named.

GUNNY BAGS, BAGGING, &c.—Bagging continues to rule quiet, and there have been no sales since our last. Prices have not changed, and holders are still quoting 9½@10½c., according to quality, but these figures are nominal, as there is no inquiry at the moment, and the tendency is in buyers' favor. Butts are also quiet, the demand having subsided, but the feeling is steady, and for a parcel 2½@2½c., cash or time, are the ruling figures for prime quality.

THE EXPORTS OF COTTON from New York this week show a decrease, as compared with last week, the total reaching 8,072 bales, against 12,574 bales last week. Below we give our usual table showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1878, and in the last column the total for the same period of the previous year

Exports of Cotton(bales) from New York since Sept.1, 1878

* Including 200 to Hull, etc.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, etc.:

CORVOA, steamer J. J. Lang, at Liverpool, Nov. 17th, from New Orleans, reports that on Oct. over 23d, in lat. 31° N., lon. 78° W., shipped a heavy sea, which smashed port lifeboat; she also had mains' aysail and maintrysail blown away. On Nov. 5th, in lat. 43° N. lon. 38° W., she shipped another heavy sea which smashed starboard lifeboat, started bridge rails, bridges, &c., and stove in the engine.

ROYAL, bark (Br.), Thomas, loaded with 1,547 bales cotton, valued at \$70,000, at Charleston, S. C., for Rotterdam, while lying in the stream, A. M. Nov. 30th, was discovered to be on fire. She was towed ashore and filled with water. The cargo is badly damaged by fire and water. The master has been ordered to take her to the pierhead and she was towed to a wharf on December 1st, to be discharged.

Cotton freights the past week have been as follows:

BREADSTUFFS.

FRIDAY, P. M., December 6, 1878.

Prices of flour have been giving way from day to day very slightly, and the decline for the week is trifling. As good lines of common extra fell below \$4, there was a liberal movement in them, mainly at \$3 90@ \$3 95. The most depression was in the better grades from winter wheat, which do not sell readily in quantities unless offered very low. Production has increased, recent rains having swollen the mill streams. To-day, a line of extra State was offered at \$3 95, and did not find a buyer.

The wheat market opened the week with a renewal of activity and in some cases firmer prices. No. 2 Milwaukee spring sold at \$1 01, but winter wheats gave way. No. 2 red winter sold at \$1 07½@1 08 spot and December, and \$1 09@1 09½ for January; No. 2 amber, \$1 05 spot and December and \$1 06 for January; No. 1 white has been active on the spot and for early arrival at \$1 09@1 10. Receipts of spring wheat have been liberal over the Milwaukee & St. Paul road, and show a considerable increase

over last year. There has been considerable speculative excitement at Chicago, but no advance in prices. To-day, the market was about steady, No. 2 red winter going at \$1 03 spot and December, and \$1 09½ for January.

Indian corn has been dull, and the poorer grades have declined—No. 3 mixed (new) to 41¢@41½¢ and steamer mixed to 45½¢; but old No. 2 has been pretty steady at 47¢. No. 2 white sold at 50¢ for export, and old round yellow at 61¢@63¢. Supplies have been moderate at all points. To-day, there was a firm but rather quiet market.

Rye has been active; some 100,000 bushels have been taken for export at 58¢@59¢ for No. 2 Western, 60½¢@61¢ for No. 1 State, and 62¢, in bond, for choice Canada. Barley has been active, and prices are quoted higher, though not satisfactorily determined, as most of the business was on private terms. Oats have been irregular. No. 1 graded declined, but they had been forced up above their relative value, and at the same time the common and medium grades slightly advanced. Yesterday, No. 2 Chicago mixed, afloat, sold at 31½¢. To-day, the market was firmer, No. 2 graded closing at 31½¢ for mixed and 33¢ for white.

The following are closing quotations:

THE DRY GOODS TRADE.

FRIDAY, P. M., December 6, 1878.

There has been a continued light movement in nearly all descriptions of seasonable goods during the past week, and operations for the spring trade were mostly restricted to placing orders for a few specialties in light-weight woollens, cottonades, white goods, &c., for future delivery. The clothing trade was fairly represented in the market, but their purchases of spring woollens were somewhat less liberal than expected, and transactions on the part of jobbers were of a strictly hand-to-mouth character. The jobbing trade was generally quiet, as is usually the case at this time of year, but the order demand for staple and department goods was fairly satisfactory, and orders were of such frequency as to indicate light stocks in the hands of retailers in most parts of the country. Foreign goods ruled quiet, aside from a few articles adapted to the coming holiday trade, which were in moderate request by local and interior retailers.

DOMESTIC COTTON GOODS.—There was a marked increase in the exports of cotton goods from this port during the week ending December 3, the total shipments having reached 5,375 packages, which were sent as follows: China, 2,920; Africa, 1,354; Peru, 560; U. S. of Colombia, 320; Great Britain, 211; Hayti, 131; British Australia, 59; Brazil, 58, &c. There was a very moderate demand for cotton goods by the jobbing trade and the piece distribution was of limited proportions. Light brown sheetings, ducks and cottonades were, however, placed in moderate lots with converters, and fair quantities of bleached shirtings were taken by the shirt trade. Corset jeans and wide sheetings were charged up to a fair amount by agents who lately placed lines of these goods "on memorandum," but new business was light and unimportant. Cotton flannels were in moderate request, and there was a slightly-improved inquiry for chevots; but denims, ticks and other makes of colored cottons ruled quiet. Agents' prices were nominally unchanged, but slight concessions were made on some of the "memorandum" goods alluded to above. Print cloths were quiet and a fraction easier at 35-16c., cash, to 3½, 30 days, for 64x64s, and 3c., cash, for 56x60s. Prints moved slowly, and Richmond's and Allen's staples were reduced in price.

DOMESTIC WOOLEN GOODS.—Heavy woollens for men's wear were only in limited demand, and fabrics of a fancy character were somewhat unsettled in price. Light-weight chevots and worsted coatings were in fair request, and liberal deliveries of these fabrics were made by agents on account of former orders. Spring-weight fancy cassimere were less active than expected, and the growing demand for chevots is no doubt checking their sale to a material extent. Overcoatings ruled quiet, and there was a lessened demand for beavers and cloakings. Black cloths and dressings were taken in small lots to a moderate aggregate, and prices ruled fairly steady. Kentucky jeans received a little more attention from Western and Southwestern buyers, and some fair sales were effected by means of very low prices. Printed sailinets were in moderate request, but blacks and mixtures remained sluggish. Flannels have become relatively quiet, and there was a very light demand for blankets, shawls and skirts.

FOREIGN DRY GOODS.—There was about the usual demand for goods adapted to the holiday trade, but otherwise foreign fabrics ruled quiet in the hands of both importers and jobbers, and transactions were light in the aggregate. Black cashmeres are steadily held at current quotations, as are desirable shades of colored cashmeres and merinos; but fancy dress goods are being offered at very low figures. Silks, trimming veils and millinery goods were offered in small lots by the auction houses, but prices ruled low in most cases, and but few more sales will be held during the season now drawing to a close.

Imports of Dry Goods.

The imports of dry goods at this port for the week ending Dec. 5, 1878, and for the corresponding weeks of 1877 and 1876, have been as follows:
